 - July 8 Monterey COE
- All sessions run 8:30-3:30.**

The iTELL Project helps teachers explore how to optimize learning, enhance student engagement, and promote high levels of content knowledge for ELL students by infusing powerful technology-enhanced strategies into teaching and learning. Research-based strategies, based primarily on GLAD and SIOP, are used with technology to increase student interest and motivation. Come learn how to make a difference in using technology to support ELL students in your classroom.

Space limited to 25 participants per session.

Effective 21st century teachers must be effective 21st century learners first. In this two-day intensive academy, teachers get a taste of both. Day one focuses on teachers as learners and guides them through an array of online tools as they work to solve a problem. Tools such as blogs, wikis, advanced searches, news aggregators, and social networks are used to access, evaluate, and maintain information sources. Day two transitions to teaching with these same 21st century tools and attitudes of mind. Join us for an invigorating, practice-changing two days.

Space limited to 25 participants per session.

Web 2.0 tools are practical mechanisms for communication, collaboration, and just plain community-building fun. Through an administrator lens, explore blogs, multimedia presentations, online meetings, online polls and surveys, and collaborative documents and sites. Plus leave with quick fun sites to build into your work with students, parents, and staff. Join us for one exciting day that can give you a whole new perspective on leadership using educational technology for the 21st century.

Space limited to 25 participants per session. Session qualifies for Admin Credential Tier II practicum hours.
