

# KNOWLEDGELAKE BRANCH CAPTURE SERVER

## Timely, Efficient Release of Remote Batch Capture

KnowledgeLake Branch Capture Server works in conjunction with Capture Server to enable all KnowledgeLake Capture products used in a branch office to aggregate, schedule and/or throttle content committal via the WAN into one secure, reliable and audited document delivery process. KnowledgeLake Branch Capture Server moves files to KnowledgeLake Capture Server where they are saved to Microsoft® SharePoint®.

*Note:* An instance of KnowledgeLake Capture Server (sold separately) is required in order to successfully install KnowledgeLake Branch Capture Server. Capture Server is the mechanism that processes batches, monitors Branch Capture Server and releases to SharePoint.

### KEY FEATURES

#### DOCUMENT IMPORT

*Create batches from multi-function devices, fax servers or any other interface*

- Ability to accept batches from KnowledgeLake Connect and Capture before submitting them to Capture Server for file format conversion, release to SharePoint and other processing
- Batch import plug-in for auto indexing comma delimited files
- Batch import plug-in for watching network directories, enabling any capture device to save image files to a shared network folder
- Caching mechanism, so that documents can be captured at full scanner speed in remote locations

#### MISCELLANEOUS

*Manage branch and home office resources most efficiently*

- Scheduled release of scanned documents to the centralized SharePoint server
- Ability to define a maximum bandwidth allocation—and schedule when the throttle occurs—so that document committal does not consume all available branch office bandwidth
- Audit trail for documents scanned in the branch office which are then delivered to and consolidated at the home office

#### TECHNICAL HIGHLIGHTS

- Lets you extend the power of Capture Server to remote offices
- Graphical AJAX interface to monitor the health and activity of the Capture Server  
Ability to schedule processing during off-peak hours
- Efficient binary protocol transfer
- HTTP connection without the need for any database calls

## The KnowledgeLake Family of Imaging and Capture Products

From the desktop to the enterprise, KnowledgeLake products help you maximize your SharePoint investment by speeding up how quickly you achieve ROI, lowering the total cost of ownership and increasing productivity for a complete enterprise content management solution.

#### KNOWLEDGELAKE IMAGING FOR SHAREPOINT

*Scalable document imaging built on Microsoft SharePoint*

#### KNOWLEDGELAKE CAPTURE SUITE

*Complete document capture system for Microsoft SharePoint*

- *KnowledgeLake Capture*  
Batch scanning and indexing for SharePoint
- *KnowledgeLake Connect*  
SharePoint integration for any desktop application
- *KnowledgeLake Capture Server*  
Batch capture processing, management and scanning/indexing for network capture devices
- *KnowledgeLake Branch Capture Server*  
Timely, efficient release of remote documents

#### About KnowledgeLake

KnowledgeLake, Inc. develops document imaging, document capture, and workflow products and solutions for Microsoft SharePoint. KnowledgeLake extends the Enterprise Content Management (ECM) capabilities of SharePoint, enabling businesses to reduce mailing costs, streamline operations, and achieve regulatory compliance using familiar Microsoft products that most businesses already own and use.
