Professional Experience

Sprettur ehf

Software Developer (Intern)
2011 (4 months)
Iceland

Developed an online shipping calculator and a thermal-printing software for a transport company. This involved understanding the underlying legacy system and interfacing with the database. Participated in various planning and training sessions.

c# windows zebra jquery javascript agile kanban

Stockvault.net

Freelance Developer
2010 (summer)
Denmark

Developed and deployed a custom content-management-system for a high-traffic (70.000 page views per day) stock photograph website.

php mysql web-development jquery javascript css

Aalborg University

Student Developer
2009 (summer)
Denmark

Developed a geolocation-based prototype in Java on the Android platform using RSS feeds and a XML backend.

java android mobile xml django python

Calidris ehf

Technical Consultant
2007-2009 (part-time)
Iceland

Provided consulting and system management assistance from Denmark. Provided help and training for my replacement as System Administrator.

cisco vpn remote-assistance hosting linux consulting

Calidris ehf

System Administrator
2004-2006
Iceland

Responsible for managing in-house infrastructure as well as providing technical support to co-workers and customers. Managed all network connections (fiber, staff dsl connections, site-to-site). Installed and configured test systems, workstations and company servers. Migrated company from ISDN PBX towards a modern Asterisk based telephony system with SIP trunk lines.

hosting voip linux windows support network asterisk cisco active-directory

Hringiðan ehf

System Administrator
2002-2004
Iceland

Started in customer-service where I provided 1st level support, remotely and on-site. Gradually moving towards more system and network management and officially became, head system administrator in 2003. Managed our hosting environment, network connections and provided 2nd level support to enterprise customers.

2000-2001: Títan hf (Iceland) - Network technician

1999-2000: Firmanet ehf (Iceland) - Web developer

1998-1999: Frisk Software (Iceland) - Software tester

Expertise

in text...

level of expertise...

I have extensive experience in running computer systems (Mac, Linux, Unix and Windows) both as workstations and as servers. I have managed medium-sized hosting environments. I have provided technical-support on both personal and enterprise level as both first-level support and second-level support for a number of years. Among the hosted services I have provided are email, calendar, web hosting, authentication, dns, internet-telephony, backup, developer services (such as version control and test environments) and virtual machines.

I am experienced at designing, maintaining and monitoring company networks as well as managing Internet connections, firewalls, routers and switches. I have deployed and maintained virtual-private-connections for remote-access as well as site-to-site connections and often in cooperation with offshore partners.

My professional software development experience includes designing and developing customised web-based systems using PHP, MySQL, HTML and Javascript. During my studies I have completed various projects with numerous tools, such as C, C++, C#, Qt and a number of 3rd party libraries.

I speak fluent English, Danish and Icelandic. I am solution oriented, independent and dedicated to what I do. I am used to with working in groups and brain-storming ideas between co-workers.

Personal Life

Was a student helper at Open Source Days in Copenhagen 2010. Staff member of Skjálfti (Icelandic Game Tournament) between 2000 and 2004 where I helped out with daily operations and ran a couple of game servers. Participated in the "Linux in Iceland" initiative between 1999 and 2003 where we maintained an Icelandic Linux news site, held events where people could come in with their computers and we would help them install and start using their systems.

When not working, I like to keep myself up-to-date on the latest technologies and work on some of my own ideas. I find, that it is important to occasionally get away from the computer and I enjoy training fitness and playing basketball.

The remainder of my personal time is spent with my girlfriend, travelling and watching movies.
