

Weighing the Evidence: Important New Considerations in Type 2 Diabetes

Tuesday, October 7, 2008

6:30 pm

BlackFoot Inn

5940 Blackfoot Trail SE

Calgary, Alberta

403-252-2253

Speaker

Stuart Ross, MB, ChB, FRCPC, FRACP
Clinical Professor,
Faculty of Medicine, University of Calgary;
Director,
Calgary Metabolic Education and Research Centre

Learning Objectives

Through their participation at this program, participants will be able to:

- Review the newest evidence on micro and macrovascular implications of glycemic control in type 2 diabetes;
- Explore the clinical significance of current diabetes outcome trials and what impact they have on the management of type 2 diabetes (VADT, ACCORD trials);
- Evaluate current therapeutic choices in diabetic management, with the goal of optimizing patient selection and therapeutic outcomes.
