

CRIB SAFETY

Consignor Safety Checklist

In an effort to help ensure that the cribs we are selling are in safe, working condition, please follow this guide to inspect the crib you intend to sell.

PLEASE PRINT THIS CHECK-LIST OUT, COMPLETE IT AND BRING IT WITH YOU TO ATTACH TO YOUR CRIB AFTER CHECK-IN

Please Check One:

- NO, DOES NOT HAVE DROP-SIDES
- YES, DOES HAVE DROP-SIDES, but has NOT BEEN RECALLED. Drop-sided cribs can be potentially hazardous to babies, who can get their limbs caught inbetween the crib and the drop-side.

Check-off each item after inspection has been done:

- Make absolutely certain that the crib has NOT been recalled. Recall notices can be found online at: www.cpsc.gov or call the toll-free hotline at: 800-638-2772 for product recall information in English or Spanish. *NOTE: Some crib recalls are minor and can be easily repaired by obtaining repair kits directly from the manufacturer. Unless you know for CERTAIN that the recall was properly repaired, do not trust that the crib is safe.
- Crib slates or spindles are spaced NO MORE than 2d" (60 mm) apart. (About the width of a soda can.)
- Slates or spindles are not missing, loose, cracked or splintered.
- There are no sharp, pointed, rough or jagged edges.
- Wood surfaces are smooth and free from splinters, splits or cracks. No cracked, chipped or peeling paint.
- There are no missing, loose, broken or improperly installed screws, bolts, brackets or other hardware on the crib or the
- All hardware for the Mattress support/base are original or are authentic replacements obtained from the manufacturer.
- No decorative corner posts or finials that extend more than 1/16" (1½ mm) above the end panels.
- No cutout designs in the end panels. (Headboard or footboard.)
- Mattress support is securely attached to end panels and cannot be easily dislodged from corner posts.
- Mattress fits tight. No more than two fingers width between the edge of the mattress and the crib side.
- If Mattress is included, it is firm and tight fitting.
- Drop-side latches are too difficult to be released by a child (if applicable).

NOTE: Cribs manufactured before 1990 do NOT meet current safety standards.

**If you find a crib that isn't safe, we suggest that you DESTROY IT—
It Could Save A Baby's Life!**
