## Temenos T24™ Business Process Management

Banking Alliance offer a Business Process Management (BPM) advisory & implementation service for Temenos clients wishing to improve straight through processing levels, provide integrated multi-channel products, reduce operating costs and improve customer service experience.

Banking Alliance will help you develop a business case, select the most appropriate BPM tool and assist you with the implementation and integration into your Temenos platform.

### BPM Experience

Our experienced BPM consultants have an in-depth knowledge of the leading BPM tool providers having implemented BPM into many Tier1 Banks.

Our software selection methodology will help you choose the most appropriate BPM technology taking into consideration your budget, IT strategy, architecture, technology stack and business operating environment.

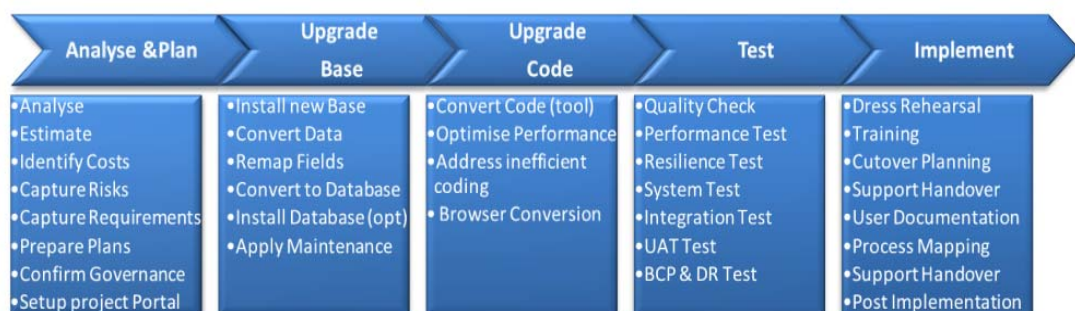

Banking Alliance can help you understand the options, costs, risks and timescales associated with adopting BPM typically implemented as part of a T24 upgrade project.

### Discovery Phase

The first step towards understanding the benefits and costs associated with BPM is to run a short discovery phase . Our consultants can advise you on the options available, the implementation approach, the timescales and costs associated with implementing BPM.

### Implementation Phase

During the Discovery phase we will help you develop an implementation strategy that suits your budget and risk appetite. The Banking Alliance upgrade methodology can be used as a starting point and then adapted to meet specific project requirements. Banking Alliance can either manage the project on your behalf or augment your team with experienced T24 & BPM consultants.

Please contact Dave Gorman at Banking Alliance on 0871 5041418 for more information.
