CAREER OBJECTIVE

Build web sites and web applications that bring people together.

EMPLOYMENT HISTORY

Web Developer, Yahoo! Southeast Asia Pte. Ltd. (Singapore; July 2007 - present)

- Implemented front-end specifications for products using various technologies such as HTML, CSS, JavaScript, YUI, AJAX, PHP, JSON, and XML
- Influenced product user interface from conceptualization and implementation to produce best user experience within given parameters, focusing on usability and implementation calls
- Optimized front-end performance of websites to speed up page load times in a high-load, high-availability environment

SIGNIFICANT PROJECTS

- **Yahoo! 360plus**, primary front-end engineer
- **Yahoo! Blog**, front-end engineer
- **Yahoo! Malaysia News Election Microsite**, front-end engineer
- **Yahoo! Answers Messenger Plugin**, visual designer and front-end engineer

Senior Systems Engineer, STORM Consulting Inc. (Philippines; September 2005 – July 2007)

- Designed the software architecture, feature set, and visual design of products with the management and technical team as fellow stakeholders
- Built the company's Human Resources management system product offerings using technologies such as PHP, MySQL, XHTML, CSS, JavaScript
- Maintained, customized, and supported products according to client requirements
- Supervised engineers and directed task allocations for the technical team

Systems Analyst, Ecommsite Solutions Inc. (Philippines; October 2004 – August 2005)

- Designed and analyzed Web-enabled knowledge management tools or business process solutions for clients
- Matched final output against requirements prior to project hand-off
- Managed and improved internal process tools for efficiency and tracking

OTHER PROJECTS

Enthusiast

Enthusiast is a linkware script serving to manage member listings/collectives, targeted (but not limited) towards fanlistings. A full-featured, customizable and flexible script, active development is currently on hold but the script continues to be widely used in the community, with over 30,000 downloads. Technologies used include MySQL, PHP, XHTML, CSS, JavaScript.

EDUCATION

2000 – 2004

DE LA SALLE UNIVERSITY, MANILA

Bachelor of Science in Computer Science, Major in Software Technology

TECHNICAL SKILLS

Proficient in programming and markup languages such as HTML and XHTML, CSS, and JavaScript technologies, with a close regard for web standards compliance, cross-browser compatibility, performance optimization, accessibility, layered semantic markup and progressive enhancement. Intermediate knowledge of PHP and SQL (primarily MySQL variant), and has some experience with Java, JavaServer Pages, C, and Python. Basic to highly competent knowledge of various front-end and scripting language frameworks such as CodeIgniter, Symfony, YUI, and the like.

Strong design and user experience sensibilities, focusing on functionality and usage workflow with a strong regard for simplicity and definition, with an eye for detail, ranging from layout, visual design, to copy and verbal cues.

Comfortable working with development tools such as: CVS, Subversion, Bazaar, and Git for version control; prefers Mac OS X for both Web design and development but competent on Windows; working knowledge of Adobe Photoshop and Pixelmator; basic to working knowledge of Apache HTTP server, UNIX, and LINUX.
