3 Legged Thing was born out of frustration. Frustration at the thousands of tripods available in the world that only do one thing, many of which with no consideration of a photographer's workflow. It seemed obvious to our founder, Danny Lenihan, that something needed to change. Somebody needed to create a product that served multiple purposes - a broader approach to the market as a whole, with tailored idiosyncrasies to make even the most jaded photographer smile. A fresh approach was required, and, to coin a famous expression *"if not now, when?"*.

And so 3 Legged Thing was born - and like any newborn calf, we stumbled around blindly for a while, finding our feet in an already saturated market, and were shunned to a large extent by the wider photographic community, and labelled "gimmicky" and "irrelevant". The other manufacturers scoffed at our cartoonish approach, and brightly coloured tripods, dismissing us as less than the least irksome fly in a stadium.

But soon, that all changed...

PROGRESSION

That terrifying, yet inevitable consequence of time. Altogether mistrusted, and usually demonised without just cause.
Fear of change is a hangover of past generations, and not future failures.

The future - that elusive mistress that fleetingly, and speculatively taunts us, with promises of new technology and a brighter future, and tantalises us with unfulfilled potential - a never ending stairway to the next great invention.

Riches and infamy are the folly of the delusional. The future though - perhaps not as unattainable as you've been led to believe.

Tripod technology is a slow moving beast. Like the cooling lava of a lethargic volcano, it crawls, ever quietly, trudging wearily down the path of least resistance, bending to the will of the landscape, incapable of choosing a direction or purpose.

And yet, amongst the mire, nestled firmly in the bosom of innovation, is a small tripod solution from England, furiously clawing at the edge of aspiration, wading through a field of curmudgeonly Used-To-Be's, inhabiting a disparate planet of free-thinkers

So, put down your flagging has-beens, look up from your disillusion, and see what we have achieved, with nothing more than a desire to be better, to be truer to our industry. It is time, without question, to embrace a new dawn, for we are here to stay.

EQUINOX

Construction

Our tripods are meticulously crafted from 3LT's own 100% Pure **Stealth Carbon Fibre**. 8 layers of tightly woven carbon, uniquely constructed without gimmicks or patterns for optimum weight to strength ratio. Our furnishings are precision milled from aircraft-grade Magnesium Alloy, and our fixings are milled from the highest grade Stainless Steel.

Paralock

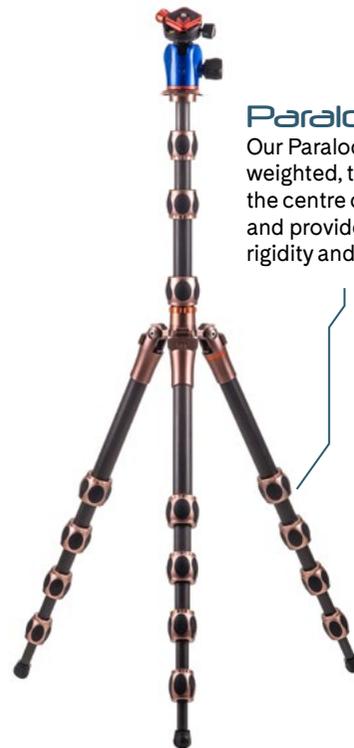

The Parallel Lock system is unique to 3 Legged Thing, and provides some of the core attributes of our Equinox range. The leg locks are weighted, to lower the centre of gravity, and the precision milled locks are wider than conventional tripods, providing better grip, and more torque, which in turn gives unequalled stability and rigidity. The system employs a back-lock, preventing users from accidentally disassembling their tripod legs, a problem common to all twist lock systems. Except ours...

Modular Technology

3 Legged Thing's unique, modular technology, enables users to utilize infinite configurations. The possibilities are extraordinary. All 3 Legged Thing tripods have a detachable leg, with standard 3/8" threads at both ends. This enables use as a monopod, or a micro-phone boom, selfie stick, camera boom arm and many other functions.

Paralocks

Our Paralocks are weighted, to lower the centre of gravity and provide greater rigidity and stability.

Tri-Mount Plate

The extraordinary Tri-Mount plate is one of the most radical innovations on Equinox. Designed with seven individual mounting points and three hollow spurs for secondary attachments, the Tri-Mount plate is unchallenged in tripod technology, and beautifully symmetrical. Unique to 3 Legged Thing, the Tri-mount plate means that it's more than just a tripod. It's an adaptable, convertible, multi-functional mounting system for a wide range of technologies.

Dynamic Range

All of our tripods enable the column to be removed, and our patented Tri-Mount plate to be connected directly to the tripod canopy. This allows the tripod to be taken to near ground level, giving our tripods the widest dynamic height range of any tripod in their class.

Peak Design

Since our launch in 2011, we've tried to incorporate as many technologies and integrations as we can into our systems. This includes working with like minded companies such as Peak Design. With our QR3P release plate, we have become fully compatible with the Peak Design Capture plate system, and Peak Design straps and sling straps.

Albert

Premium Carbon Fibre Travel Tripod System

Albert is the world's most versatile travel tripod system. With modular technology and adaptable configuration, Albert is the perfect companion for a wide range of uses, and for photographers of all walks of life. Small enough to fit in your hand luggage, Albert is easy to carry anywhere. Light enough for long hikes, but heavy duty enough for even the toughest conditions, Albert's award winning modular design makes him the must-have tripod for all photographers.

Outstanding Rigidity

Our unique parallel locking system is wider than conventional tripods, making it easier to lock the legs. The increased torque, coupled with our patented internal mechanism gives never-before-seen levels of rigidity and stability in a travel tripod.

Folded Length - 410mm

Tripod Specifications	Metric	Imperial
Max Height	1790 mm	70.5 "
Max Height Without Column	1230 mm	48.5 "
Minimum Height	130 mm	5 "
Folded Length	410 mm	16 "
Max Leg Tube Diameter	26 mm	1.02 "
Monopod Min Height	380 mm	15 "
Monopod Max Height	1285 mm	50.5 "
Leg Sections	5 Sections	
Column Sections	3 Sections	
Leg Angles	23°, 55°, 80°	

Tripod Weight	1.85 kg	4.08 lbs
Load Capacity 23°	30 kg	66.15 lbs
Load Capacity 55°	20 kg	44.10 lbs
Load Capacity 80°	10 kg	22.05 lbs

*"Logic will get you from A to B.
Imagination will take you everywhere"*

- Albert Einstein

LEO

Professional Carbon Fibre Micro-Traveler

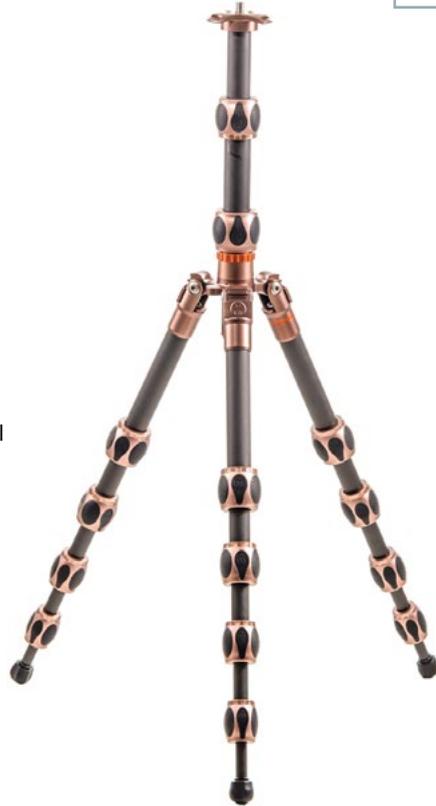

Leo is our first ever professional micro-traveler. Packing an unprecedented level of functionality and capability, Leo transcends the divide between compact travel and professional tripod systems. Gritty, determined, and anti-establishment, Leo challenges the very fabric of our understanding of conventional tripod technology.

Leo's unique, modular design enables this incredible tripod to fold to just 35cm, but still extend to a good working height.

Aircraft-grade
Magnesium Alloy

Folded Length - 350mm

Tripod Specifications	Metric	Imperial
Max Height	1310 mm	51.5 "
Max Height Without Column	970 mm	38.5 "
Minimum Height	120 mm	4.75 "
Folded Length	350 mm	13.75 "
Max Leg Tube Diameter	26 mm	0.91 "
Monopod Min Height	550 mm	21.5 "
Monopod Max Height	1370 mm	54 "
Leg Sections	5 Sections	
Column Sections	2 Sections	
Leg Angles	23°, 55°, 80°	
Tripod Weight	1.44 kg	3.18 lbs
Load Capacity 23°	30 kg	66 lbs
Load Capacity 55°	20 kg	44 lbs
Load Capacity 80°	10 kg	22 lbs

*“Learning never
exhausts the mind”*

- Leonardo Da Vinci

Winston

Premium Carbon Fibre Professional Tripod System

Winston is our most stable tripod yet. Resolute and steadfast under the most demanding of circumstances and built to carry heavy burdens to the end.

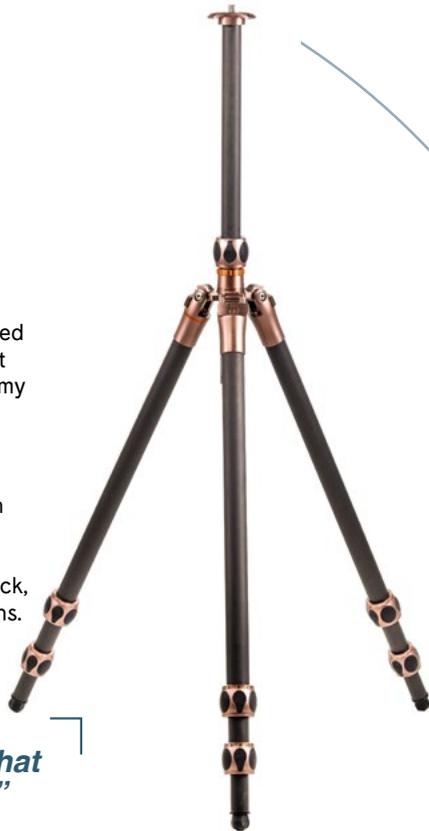

Winston lives up to his namesake as a rugged and determined contributor. Powerful, light and easy to transport, Winston is the epitomy of everything we strive for.

Monopod

As with all 3 Legged Thing tripods, Winston has a detachable leg, with standard 3/8" threads at both ends. This enables use as a monopod, or a microphone boom, selfie stick, camera boom arm and many other functions.

“Attitude is a little thing that makes a big difference”

- Winston Churchill

Tripod Specifications	Metric	Imperial
Max Height	1850 mm	73 "
Max Height Without Column	1440 mm	56.5 "
Minimum Height	170 mm	6.75 "
Folded Length	600 mm	24 "
Max Leg Tube Diameter	29 mm	1.14 "
Monopod Min Height	570 mm	22.5 "
Monopod Max Height	1500 mm	59 "
Leg Sections	3 Sections	
Column Sections	1 Sections	
Leg Angles	23°, 55°, 80°	

Tripod Weight	1.75 kg	3.8 lbs
Load Capacity 23°	40 kg	88 lbs
Load Capacity 55°	25 kg	55 lbs
Load Capacity 80°	15 kg	33 lbs

Folded Length - 600mm

Punks

A diverse array of ideologies, fashions and forms of expression. A subculture which is largely characterized by anti-establishment views and the promotion of individual freedom.

It is fitting, therefore, that our latest range of Punks should exemplify these characteristics. Punks bring class and innovation to a festering stagnation of under-achieving budget tripods, with no ambition, and limited capabilities.

Designed to challenge conventional wisdom, to exceed expectations, and to inspire a generation of photographers, not to be better, but to be confident, and to enjoy their craft, irrespective of the views of others.

And so we, the British, the protagonists of Punk, the champions of freedom and expression, stand proudly behind our latest creations, flaunting our magnificence, corroding conformity, and challenging this industry to be better, to be bolder, and to be more diverse.

3LT Punks. Unshackled from convention. Uncompromising standards. Unlimited potential.

Corey

Micro-Travel Tripod System

Corey is a new generation of micro traveller tripods. Packed full of features, with extraordinary functionality and capability, the new Corey tripod is a culmination of 2 years of design and development.

With 5 section legs and a 2 section column, Corey extends to a good working height, whilst retaining the ability to fold down to an incredibly compact size for stowage. With a load capability of 14kg / 30lbs, Corey is the perfect combination of weight, size and capability for photographers of all genres and abilities.

Folded Length - 350mm

Tripod Specifications	Metric	Imperial
Max Height	1475 mm	58 "
Max Height Without Column	1180 mm	46.3 "
Minimum Height	100 mm	4 "
Folded Length	350 mm	13.7 "
Max Leg Tube Diameter	23 mm	0.9 "
Tripod Weight	1.5 kg	3.4 lbs
Monopod Max Height	1500 mm	59 "
Tripod Load Capacity	14 kg	30.86 lbs
Leg Sections	5 Sections	
Column Sections	2 Sections	
Leg Angles	23° 55' 85°	

AirHed Neo Specifications	Metric	Imperial
Height	85 mm	3.5 "
Weight	298 g	0.65 lbs
Base Width	43 mm	1.75 "
Plate Size	38 x 38 mm	1.5 " x 1.5 "
Load Capacity	20 kg	44.09 lbs
Controls	Lock, Base Pan & Plate Release	
Compatibility	Peak Design Capture & Standard Arca Swiss	

Travis

Multi-Purpose Tripod System

Travis is the first Punks tripod designed for every day use. Packed full of features, with extraordinary functionality and capability, Travis will appeal to any photographer looking for a great all-round tripod.

With 4 section legs and a single column, Travis provides exceptional stability and rigidity, and a load capability of 18kg / 40lbs. Perfect for photographers of multiple genres, and adaptable to almost any situation, the new Punks Travis is an excellent multi-purpose tripod for general use.

Folded Length - 450mm

Tripod Specifications	Metric	Imperial
Max Height	1650 mm	65 "
Max Height Without Column	1390 mm	55 "
Minimum Height	110 mm	4.25 "
Folded Length	450 mm	17.5 "
Max Leg Tube Diameter	230 mm	0.90 "
Tripod Weight	1.6 kg	3.6 lbs
Monopod Max Height	1710 mm	67 "
Tripod Load Capacity	18 kg	40 lbs
Leg Sections	4 Sections	
Column Sections	1 Sections	
Leg Angles	23° 55' 85°	

AirHed Neo Specifications	Metric	Imperial
Height	85 mm	3.5 "
Weight	298g	0.65 lbs
Base Width	43 mm	1.75 "
Plate Size	38 x 38 mm	1.5 " x 1.5 "
Load Capacity	20 kg	44.09 lbs
Controls	Lock, Base Pan & Plate Release	
Compatibility	Peak Design Capture & Standard Arca Swiss	

AirHed 360

Precision Engineered Multi-Function Ball Head

Our flagship professional AirHed is a beautifully crafted, multi-functional ball-head, precision engineered from aircraft-grade magnesium alloy, and furnished with stainless steel fixings.

Control

The AirHed 360 comes with an unprecedented level of control, with two pan functions, our strongest locking system yet, and smooth, precision action. The ergonomic grip of the main control knob makes it easy to hand tighten the AirHed, and with a working load capability of 40kg, the AirHed 360 is a powerful companion to any tripod.

Design

Designed with a traditional base pan-and-lock mechanism, which allows for smooth panning, even under load. The unique pano-clamp also enables panning from the top, for when the ground is uneven, and it is impossible to get the tripod level – now you can just level the clamp and still pan smoothly on a flat plane.

The AirHed 360 incorporates 3 Legged Thing's innovative modular design, enabling users to detach the pano-clamp for use on any 3/8" device.

Compatibility

The AirHed 360 comes with the QR3P Release Plate, which is both Peak Design, and Arca Swiss compatible. The AirHed 360's pano-clamp is compatible with all standard Arca Swiss release plates.

Airhed 360 Specifications	Metric	Imperial
Height	100 mm	3.94 "
Weight	0.408 kg	0.9 lbs
Base Width	43 mm	1.69 "
Plate Size	38 x 38mm	1.5 " x 1.5 "
Load Capacity	40 kg	88 lbs
Controls	Lock, Base Pan, Top Pan & Plate Release	
Compatibility	Peak Design Capture & Standard Arca Swiss	

AirHed Switch

Precision Engineered Ball Head

The AirHed Switch is our smallest professional AirHed is a beautifully crafted, multi-functional ball-head, precision engineered from aircraft-grade magnesium alloy, and furnished with stainless steel fixings.

Control

The AirHed Switch comes with our awesome switch locking system. The ergonomic grip of the main control knob makes it easy to hand tighten the AirHed, and with a working load capability of 40kg, it is one of the strongest ball-heads in the world.

Design

Designed with a traditional base pan-and-lock mechanism, which allows for smooth panning, even under load.

The AirHed Switch incorporates 3 Legged Thing's innovative modular design, enabling users to detach the clamp for use on any 3/8" device. This is particularly useful if using the detachable monopod leg on any 3 Legged Thing tripod.

*“Creativity is
intelligence having fun”*

- Albert Einstein

Compatibility

The AirHed Switch comes with the QR3P Release Plate, which is both Peak Design, and Arca Swiss compatible.

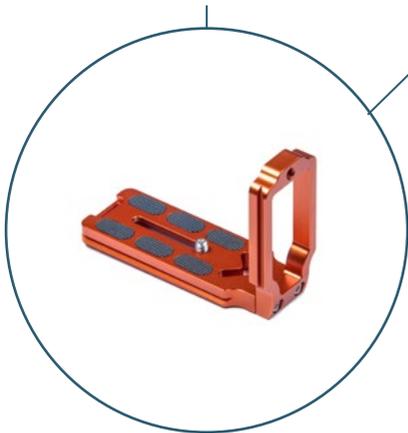

The AirHed Switch clamp is adjustable to fit Arca Swiss style release plates with varying profiles.

Airhed Switch Specifications	Metric	Imperial
Height	89 mm	3.5 "
Weight	0.282 kg	0.62 lbs
Base Width	37 mm	1.46 "
Plate Size	38 x 38mm	1.5 " x 1.5 "
Load Capacity	40 kg	88 lbs
Controls	Lock, Base Pan, Top Pan & Plate Release	
Compatibility	Peak Design Capture & Standard Arca Swiss	

Headwear

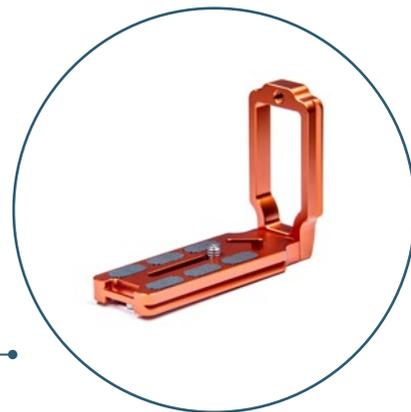

QR10-L

The new QR10-L Quick Release Plate comes with a 100mm base, side bracket with cable access and 1/4"-20 accessory mount, compatible with standard Arca Swiss® clamps and heads. Designed to make the switch from landscape to portrait quick and easy, and with a side 1/4"-20 mount for optional accessories, the QR10-L takes L Bracket functionality into the 21st century.

Compatibility

The QR10-L is also compatible with most DSLR's. In order to comfortably fit your camera, the centre of the screw socket on the underside of your camera should be no further than 7.5cm / 3" from the left edge of your camera.

QR3P

The QR3P Release Plate is designed for ultimate functionality, combining a standard 38mm Arca shoe, with the patented Peak Design Capture Shoe. QR3P sits tight to your camera without any movement or drift, and slots beautifully into any Peak Design Capture device or standard Arca Swiss clamp. With milled stainless steel camera screw, the QR3P-EQ is secure and strong.

QR6

The QR6 Release Plate is designed for ultimate security. With a 38mm x 60mm footprint, the QR6 offers 3 slotted 1/4"-20 sockets to give you more alignment options for your camera. Includes a milled stainless steel camera screw and 2 x 2.5mm hex retaining bolts.

TOOLZ

Each of our professional tripod systems comes complete with our convenient multi-tool. With a hex key, coin key, bottle opener and key ring attached to a handy carabiner, the TOOLZ has everything you need when on location.

Footwear

Heelz

Designed for use on harder surfaces such as concrete and rock, and equally at home on abrasive surfaces like carpet and vinyl, Heelz are the perfect accompaniment for your tripod. Heelz will provide additional stability, whilst making your tripod look epically cool. Made from premium stainless steel, Heelz are made to support and protect your tripod on a variety of terrains and climates, for years to come.

Compatibility

Each pack of foot accessories comes with a 1/4"-20 thread and 3/8" stainless steel threaded sleeve. Each are universally compatible with any tripod that has either of these standard fittings.

Stilettoz

Stilettoz are at home on either rocky or soft ground. Designed to elevate your tripod clear of potentially harmful terrain, or for embedding in softer ground to provide a firmer anchor during windy and turbulent weather.

Made from premium stainless steel the Stilettoz are an essential component for long exposures and use in adverse conditions.

Clawz

Getting a grip on rocky and icy surfaces can be a real challenge. Clawz make light work of these tricky conditions, and also spread the load over a wider area, making them ideal for use on malleable terrain, such as snow and sand. Clawz will give your tripod greater stability, and firmer grip, in the most demanding circumstances.

Bootz

Bootz are designed for everyday wear on your tripod. Suitable for all but the meanest of conditions, Bootz are a jack-of-all-trades in tripod footwear, and good for most occasions.

Made from hard-wearing rubber and premium stainless steel the Bootz are an essential component of daily tripod use. Bootz are fitted as standard on all 3 Legged Thing tripods.
