### Our Program

National Environmental Education (EE) Week is the largest organized environmental education event in the United States.

EE Week connects
educators with environmental
resources to promote K-12
students' understanding of
the environment.

# Featured Green STEM Innovator

NEXT.cc

NEXT.cc is a website that provides informal learning opportunities for students through over 150 free "journeys" with transdisciplinary activities on the computer, in the classroom and out in the community, linking museums, institutions and contemporary practices with the wonder of the built and natural world.

NEXT.cc is online and free for student and teacher use. www.eeweek.org

<u>Learn more</u> about NEXT.cc and how they are engaging local schools in environmental project-based learning.

# STEM & Our Planet

Did you know? 57% of math/STEM college students say that, before college, a teacher or class got them interested in STEM.

Learn more about our 2012 theme, <u>Greening</u> STEM: The Environment as Inspiration for 21st Century Learning.

Download the STEM & Our Planet infographic at EEWeek.org.

Or, share via Facebook, Twitter.
