

Butterfly Garden at Lime Kiln Alley Park

Located at the foot of Federal St., bordered by Black's Creek, Lime Kiln Alley Park is one of our City's hidden gems. You can walk the trail through the seasons; see birds and other wildlife, picnic, and even fish the changing tides of the creek. In 2013 a beautiful "Butterfly Garden" was designed and constructed with local volunteers. It features native plants that provide habitat and food for insects, birds and local fauna.

The Bordentown City Environmental Commission

has created a native plant demonstration at the Bordentown Library on Union St. and a butterfly garden at Lime Kiln Alley. Visitors will be able to see a variety of perennial wildflowers, grasses and shrubs that are native to New Jersey, and learn about why they are good choices for landscaping plants in their backyards.

Funding for the plant materials provided by an anonymous bequest from the U.S. Charitable Trust (Henry G. Tutek, Esq., Donor Advisor)

Jacob's Ladder

The Bordentown City Environmental Commission is comprised of resident volunteers. They advise local officials, the Planning Board and the public on environmental issues, problems and opportunities. They address open space preservation, protection of wetlands and water quality, recycling and energy conservation, and environmental education. To learn more, visit: www.bcec.us
