

Tamás Kuti

WEBDEVELOPER

About

I'm a full-stack webdeveloper, who's keen on tackling complex problems with any tool that I can get my hands-on.

Work Experience

FREELANCE FRONTEND DEVELOPER

Remote, (GMT+3)

2022 April -
present

As a freelance developer I have worked on several exciting projects so far:

- Civic tech projects for an NGO monitoring corruption in Hungary
- Real-time dashboard for an access control system deployed to construction sites (Vue.js, TypeScript, Websockets)
- Health and safety application for a major international construction firm

FULL STACK ENGINEER

HealthHero Germany
Berlin, Germany

2021 September -
2022 March

HealthHero is a digital health platform, providing video consultations with GPs, e-prescriptions and other services. I was working specifically on fernarzt.com in the customer satisfaction team.

- Taking part in the effort to refactor the site from a PHP based page-by-page app, to a decoupled frontend built with Next.js (TypeScript) and Sanity.io serving as headless CMS.
- Creating a new checkout funnel for self-tests. The funnel was built with React and TypeScript and installed via NPM as a private package into the monolithic application.

- Attention to details
- Strong work ethic
- Good communication and presentation skills

Outside of Work

Trying to spend as much time away from screens as possible. Practicing Brazilian Jiu-jitsu, skateboarding, cooking or reading (mostly non-fiction).

SENIOR SOFTWARE DEVELOPER

All About Cake
Berlin, Germany

2020 November -
2021 June

Continuing my work on [backen.de](#) and its related ecosystem as part of a newly spun off company.

- Creating the first proof of concept for a decoupled web-frontend with Nuxt.js.
- Participating in the component-based development of a Next.js application.
- I've learnt to design decoupled systems, while integrating with legacy code.

USER INTERFACE ENGINEER

Oetker Digital
Berlin, Germany

2018 January -
2020 November

Worked on various projects for the digital hub of a large food and beverages conglomerate.

- React based dashboard for internal tools of the company
- Created an MVP for a meal-box delivery platform [JUJI](#), built with React and Shopware.
- Developed a REST-API connected to a Symfony based CMS, that powers the [Android](#) and [iOS](#) applications of [backen.de](#), a flagship digital product of the Oetker Group in the German market.
- Refactoring the search experience of [backen.de](#) from server-side rendered pages to a single-page-app with sorting and pagination, using Vue JS and integrating a search microservice. Collaborating with the backend developer to design the API.

FULL-STACK DEVELOPER

The Bedechka Case documentary project

Berlin, Germany

2020 - present

Acting as a one-man army for the web-presence of an indy-documentary that explores the problem of gentrification of urban greenspaces.

- Developing a highly optimized and maintainable frontend with TypeScript, SCSS and Twig
- Integrating Leaflet.js and Open Streetmaps
- Custom admin with Symfony and Doctrine
- Setting up and managing a VPS for hosting
- Automated deployment pipe-line with Github Actions

VOLUNTEER

Freie Ungarische Botschaft

Berlin, Germany

2019 - present

Volunteering, for an NGO founded by Hungarian expats in Germany, with the aim of restoring democracy and the rule of law to Hungary.

SENIOR FRONT-END DEVELOPER

Compado

Berlin, Germany

2017 June - 2017 November

My role was to build new pages, and optimize a product comparison platform.

- Introduced SVG-sprite based icon system
- Introduced Bootstrap 4
- Made a concept for running automated UI-tests on Browserstack

UX / UI DESIGNER

Develery

Budapest, Hungary

2017 January - 2017 July

- I helped to design and build [Topsters.com](https://topsters.com), a sports betting information site that provides data-driven analyses for smarter picks.
- Incremental UI/UX improvements on the company's other product [Logibet.com](https://logibet.com).
- Helped the team to transform their way of working by introducing more structured processes (Sprints tracked on a Trello board, daily standup and regular review meetings)

FRONT-END DEVELOPER

POSSIBLE CEE

Budapest, Hungary

2013 January -
2016 December

My job was to create and maintain complex web-based projects for multinational and government clients at one of the region's leading digital agencies.

- QRHacker for iOS: A reboot of a former in-house agency project, I acted as UI designer in the project.
- WPPInside: Maintenance and development of the Intranet of the world's largest communication industry holding company, in a team of more than 10 developers.
- SAPA EHS Forum: Development and maintenance of a health and safety knowledge-base application for a large manufacturing firm.
- Sport TV Live: Building a live chat application, as browser-based second screen to support sports coverages.

FRONT-END DEVELOPER

dotindot

Budapest, Hungary

2010 January -
2012 January

Building custom websites using open web technologies and a proprietary hosted CMS, mostly for Hungarian SMEs.
