Dewey Decimal Nonfiction Shelf Labels

What is included:

- 94 labels (different biography call number labels)
- 2 different sizes
- 11" x 4" - 2 labels per page - can use on magazine boxes or something similar. These are the labels on the cover.
- 6.5" x 1.5" – size of the Demco shelf label holders - 6 labels to a page
- I tried to include as much white space around each label as I could, in case you need to trim the labels to fit whatever you are using.
- Call numbers are not exact. For example, space and planets is 520's. Since these books are under more than one call number. Some of the labels have the same call number but include different categories. For example, pets. There is a generic pets for 620, but also different labels for 620 dogs, 620 cats and 620 horses. Use whatever works for you.
- I wanted to create a variety of labels since libraries are so different.
- Each file has an editable PowerPoint version. The text only can be changed. You do not need to download a font to change the text. The font I used is KA School Days.

Dewey Categories:

000's – Unsolved Mysteries, Libraries,
and Information

100's – Emotions and Feelings

133 – Ghosts & Haunted Houses

200's – Religions and Myths

291 - Myths
