Solve and Write

TEACHER NOTES

- Print off pages as needed. Each letter activity needs a recording page & a puzzle page.
- Write their name at the top.
- Look at the target letter on the right, saying the letter name and the letter sound.
- Trace over the letter with their finger (or a marker), following the correct stroke order and direction.
- Look down the list of words underneath that letter: check that they all begin with the target letter. Do they recognize any of the other letters? Can they take a guess as to what the words might be? What words can they think of that start with that sound?
- Cut out the first puzzle, cutting it into three strips. I recommend that kids do NOT cut all the puzzles out at the same time as it will make the activity much more difficult!
- Rearrange the three pieces to form a word.
 - **Hint 1:** these words always start with the target letter. Then use the picture or the letters to work out the rest of the word.
 - **Hint 2:** If the target letter is a consonant the 2nd letter will usually be a vowel (but not always).
 - **Hint 3:** If the target letter is a vowel the 2nd letter will usually be a consonant (but not always).
 - **Hint 4:** All the words are listed on the right. Can they find the matching word?
- Say the word then copy it on the line under the picture.
- Find the word on the list on the right and trace it or color it in.
- Continue with the rest of the puzzles.
- **EXTENSION:** Check the list on the right. Is it in alphabetical order?

ADDITIONAL NOTES

It's not always easy to find appropriate 3-letter words for the entire alphabet. So in this pack I've made the following accommodations.

U: we've use **U** as the **middle letter** instead of the first.

V: **veg** is short for vegetables, to **vex** is to annoy or provoke.

X: is used as the **final letter**.

Liz
