

Customer Updates... Have Never Been This Simple.

It's Time To Empty Your Voicemail Box...

Streamline Customer Relations

Give Your Clients The Project Updates They Want, When They Want Them.

Online Progress Reports.

Your supervisors can publish short, simple reports that will be delivered directly to the customer. **Just as simple as typing a text message.**

Photos & Video Uploads.

If a photo is worth 1000 words, why not use more of them and cut down on the chatter? **Show them your work, as if they were there.**

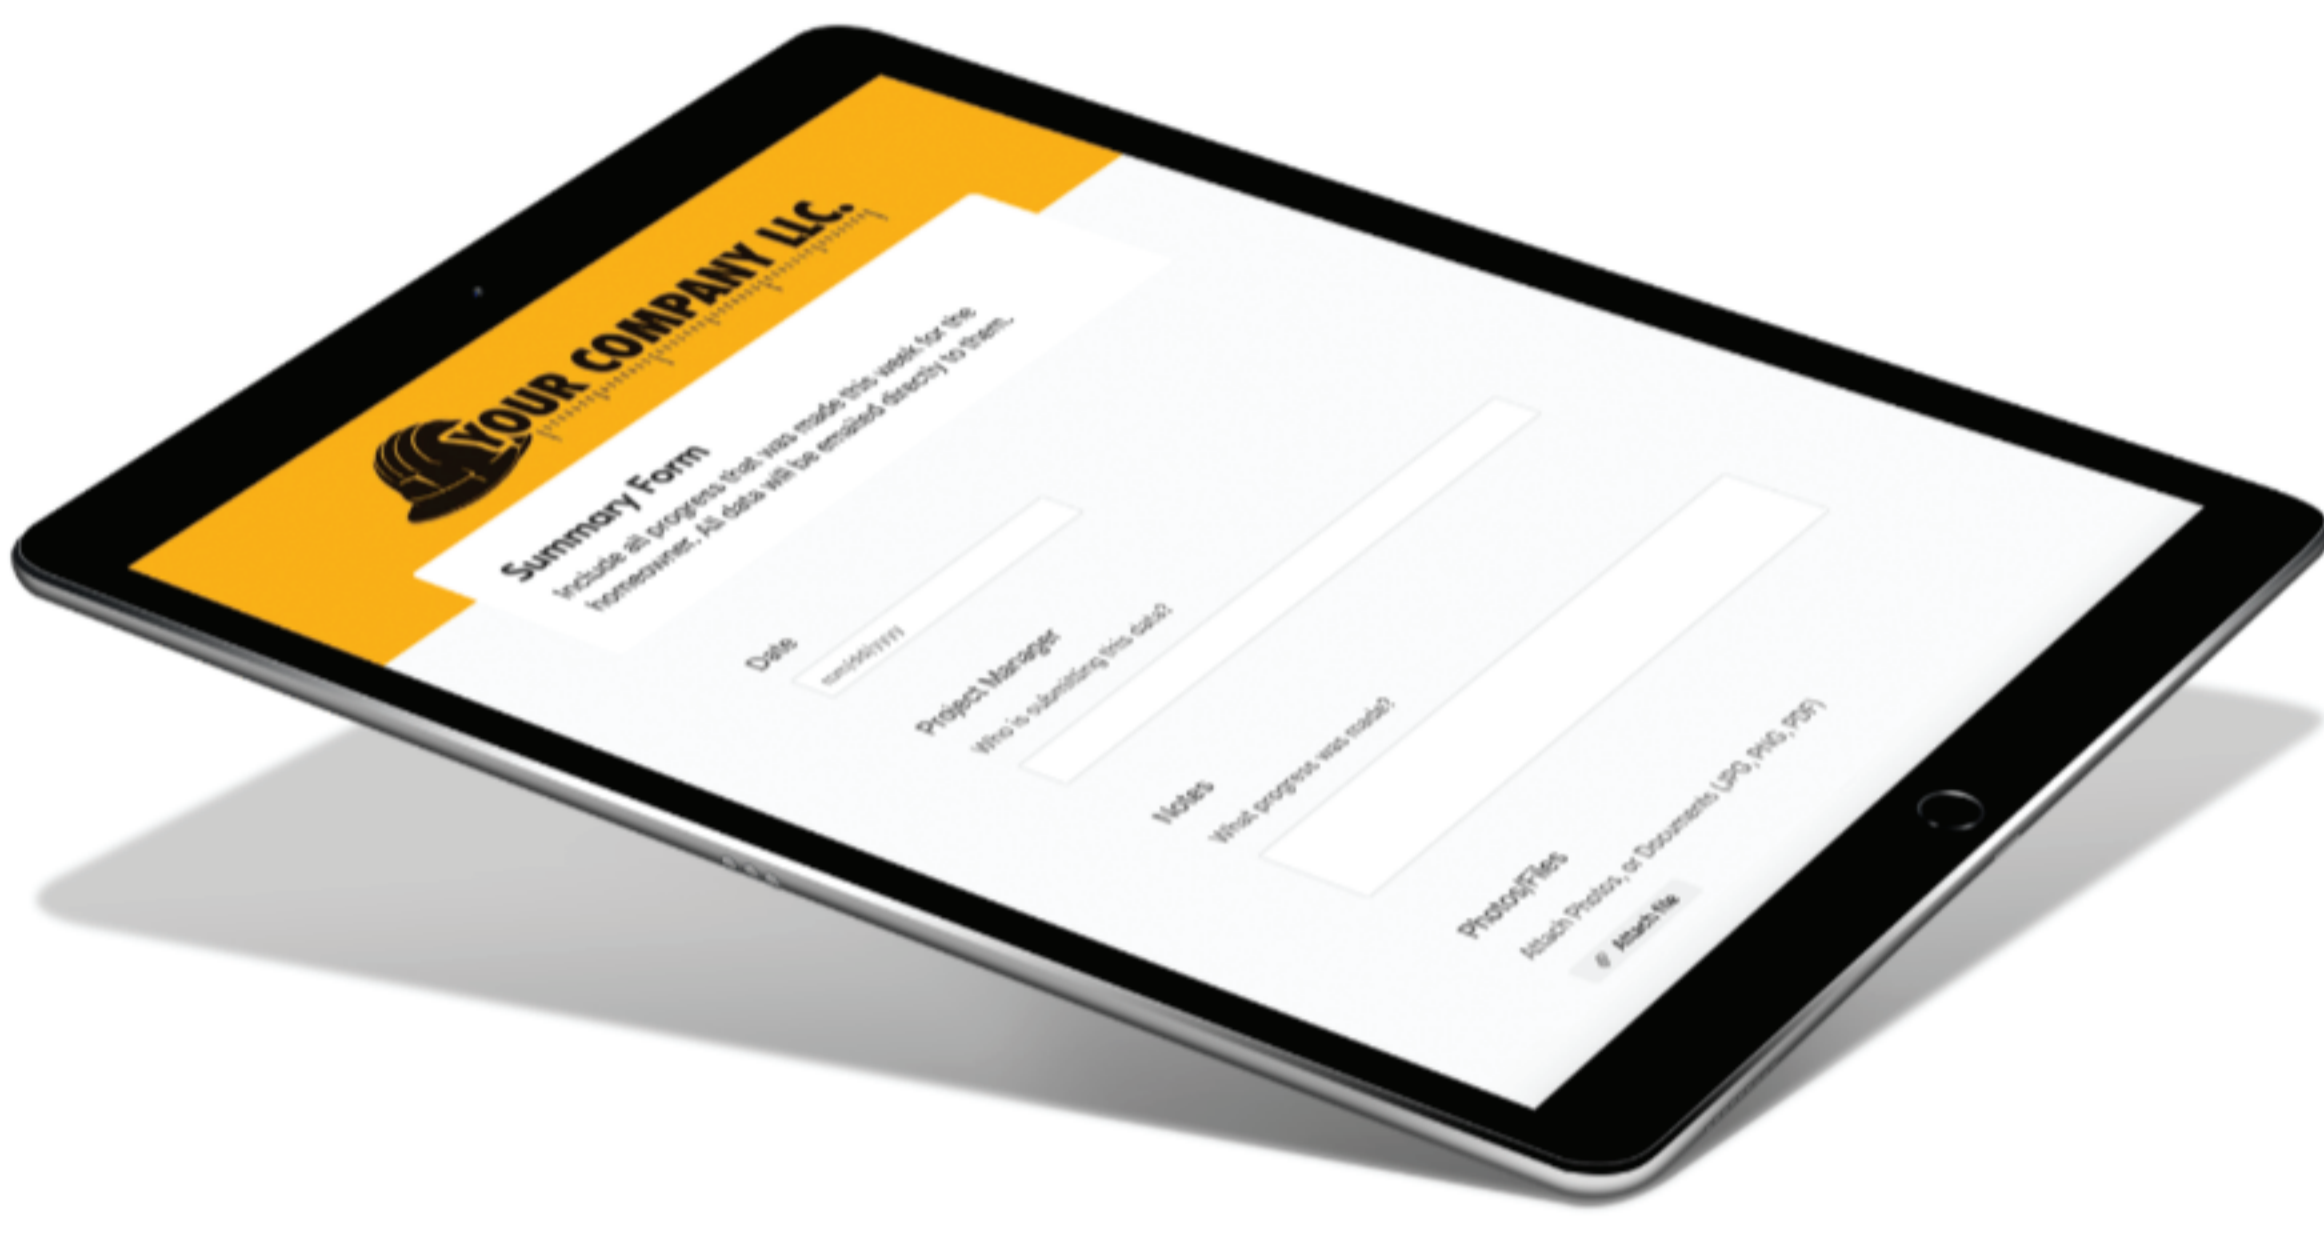

Clear, Simple Communication.

Your customers receive automated emails or text messages, keeping them informed and updated. **No more constant phone calls.**

Secure Document Signing.

Don't let contracts hold you up. Prepare documents online for signing. **Documents are encrypted in the cloud, no clutter.**

The App Makes Project Supervisors... "Super"

Managers can use your custom-branded app to:

- Submit Reports Daily, Weekly... basically anytime.
- Upload Photos, Videos, Documents and More.
- Log Hours, Expenses, Travel... for your entire team

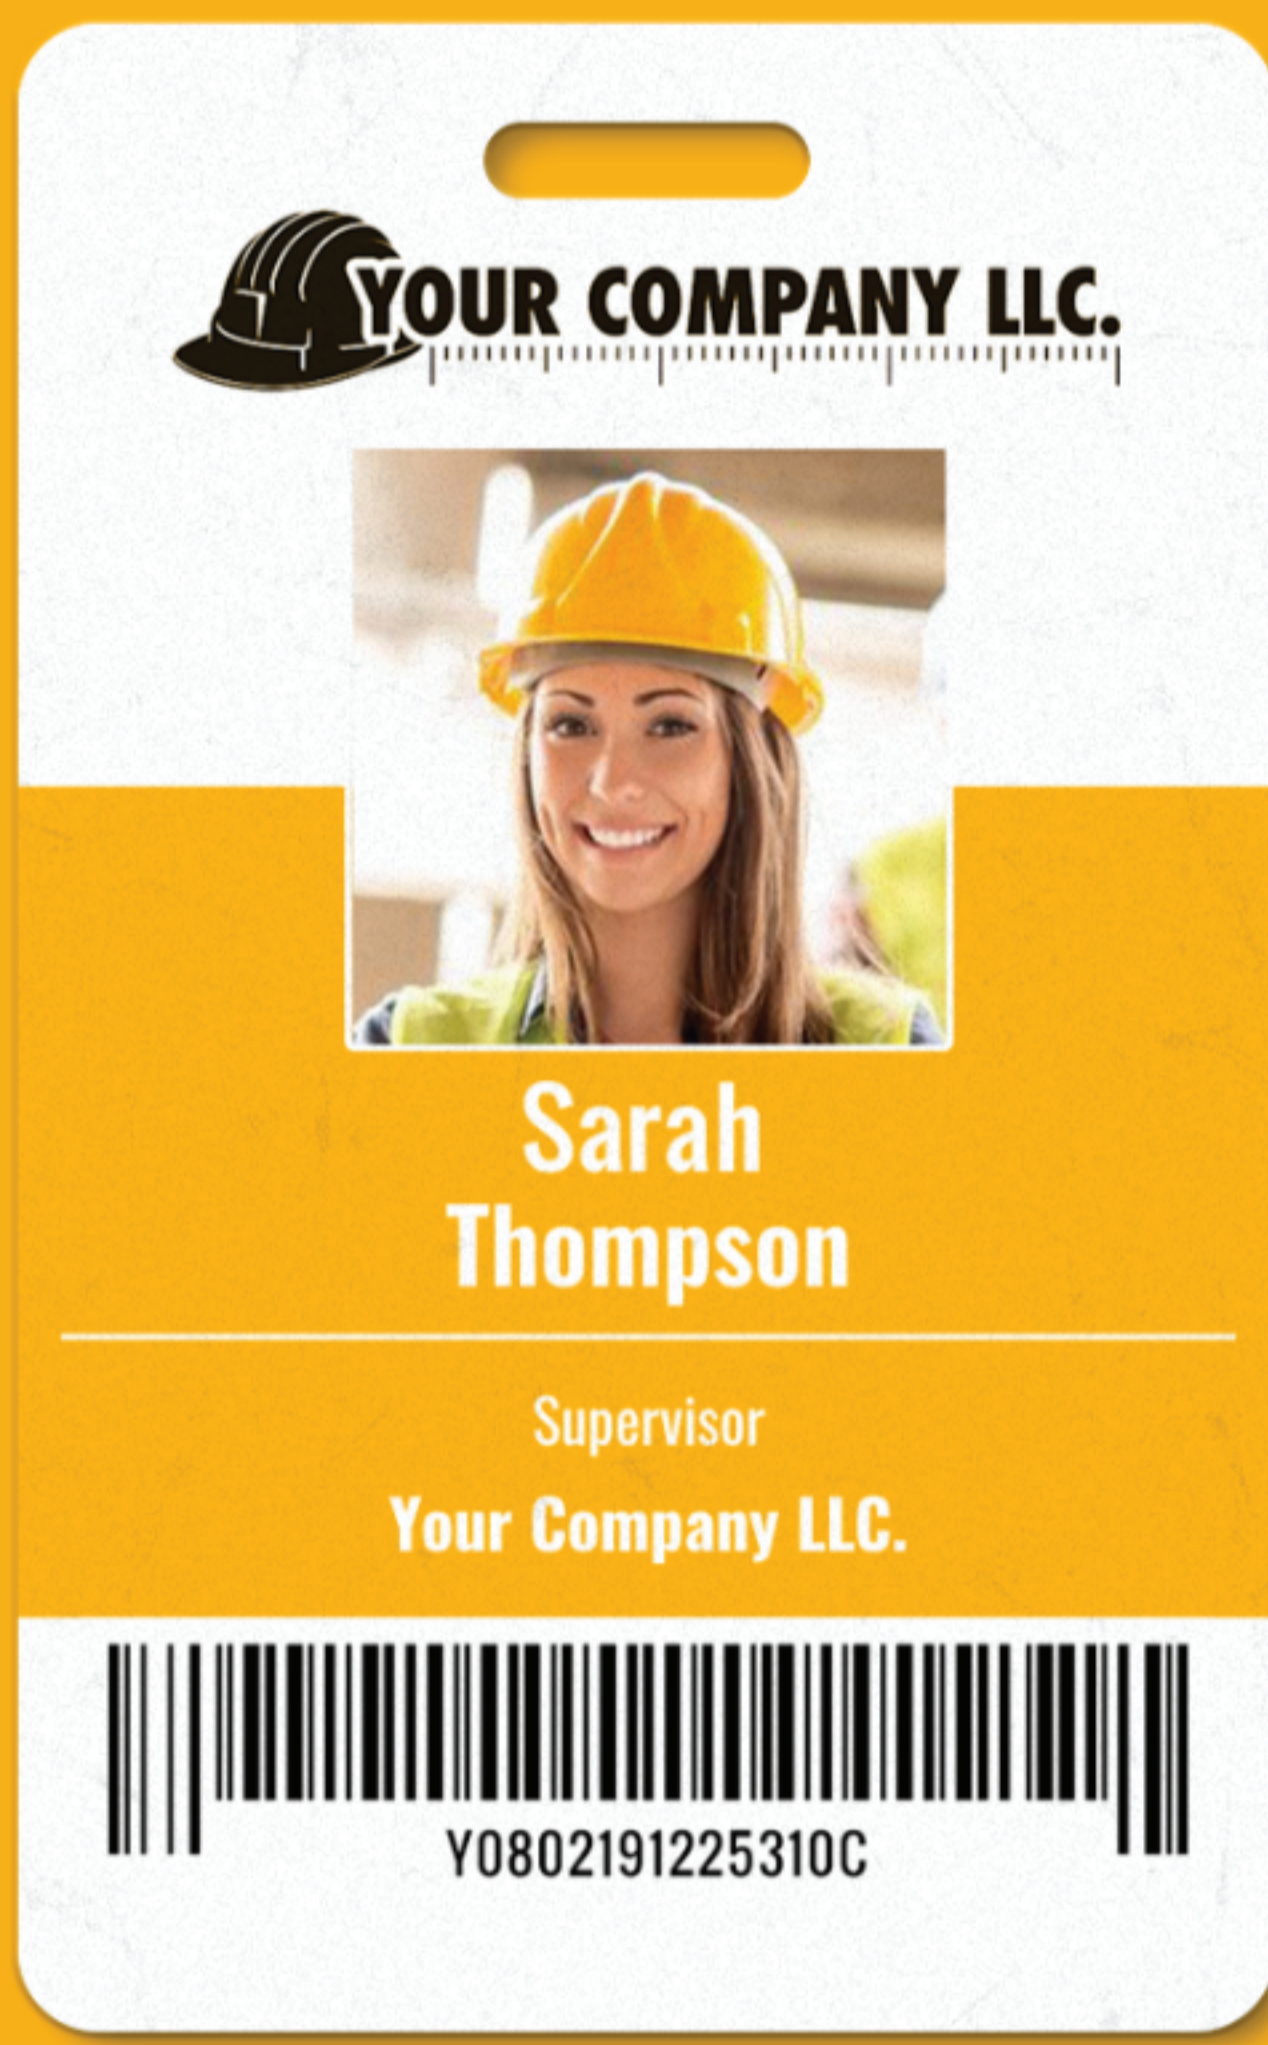

Our goal here is to keep customers informed and keep your phone from ringing off the hook... it's that simple.

Your Customer is updated right away.

The unique customer-portal can be hosted on your existing website and gives them direct access to:

- Supervisor Progress Reports
- Photos/Videos You Share
- Communication Tab For Feedback
- Email Updates & Optional Text Messages

[Learn More](#)

Utilize Custom ID Badges and Track From Start to Finish.

Project Supervisors can use ID Badges to:

- Scan On and Off-Site Each Day
- Manage Sub-Contractors on Every Project
- Log Visitors on the Job
- Generate Detailed Reports for Insurance
- Track Labor Hours & Breaks

Get rid of time cards and use your app to manage the logistics of your projects. Export anytime to keep a paper trail.

How It Works.

We work together to build a database that fits **Your Exact Needs.**

For each project, we determine what data you want to include:

- Project Notes: Quickly type out what progress was completed.
- Photos, Videos or Documents... if you can attach it, we can use it.
- All entries are timestamped and assigned by supervisor name.

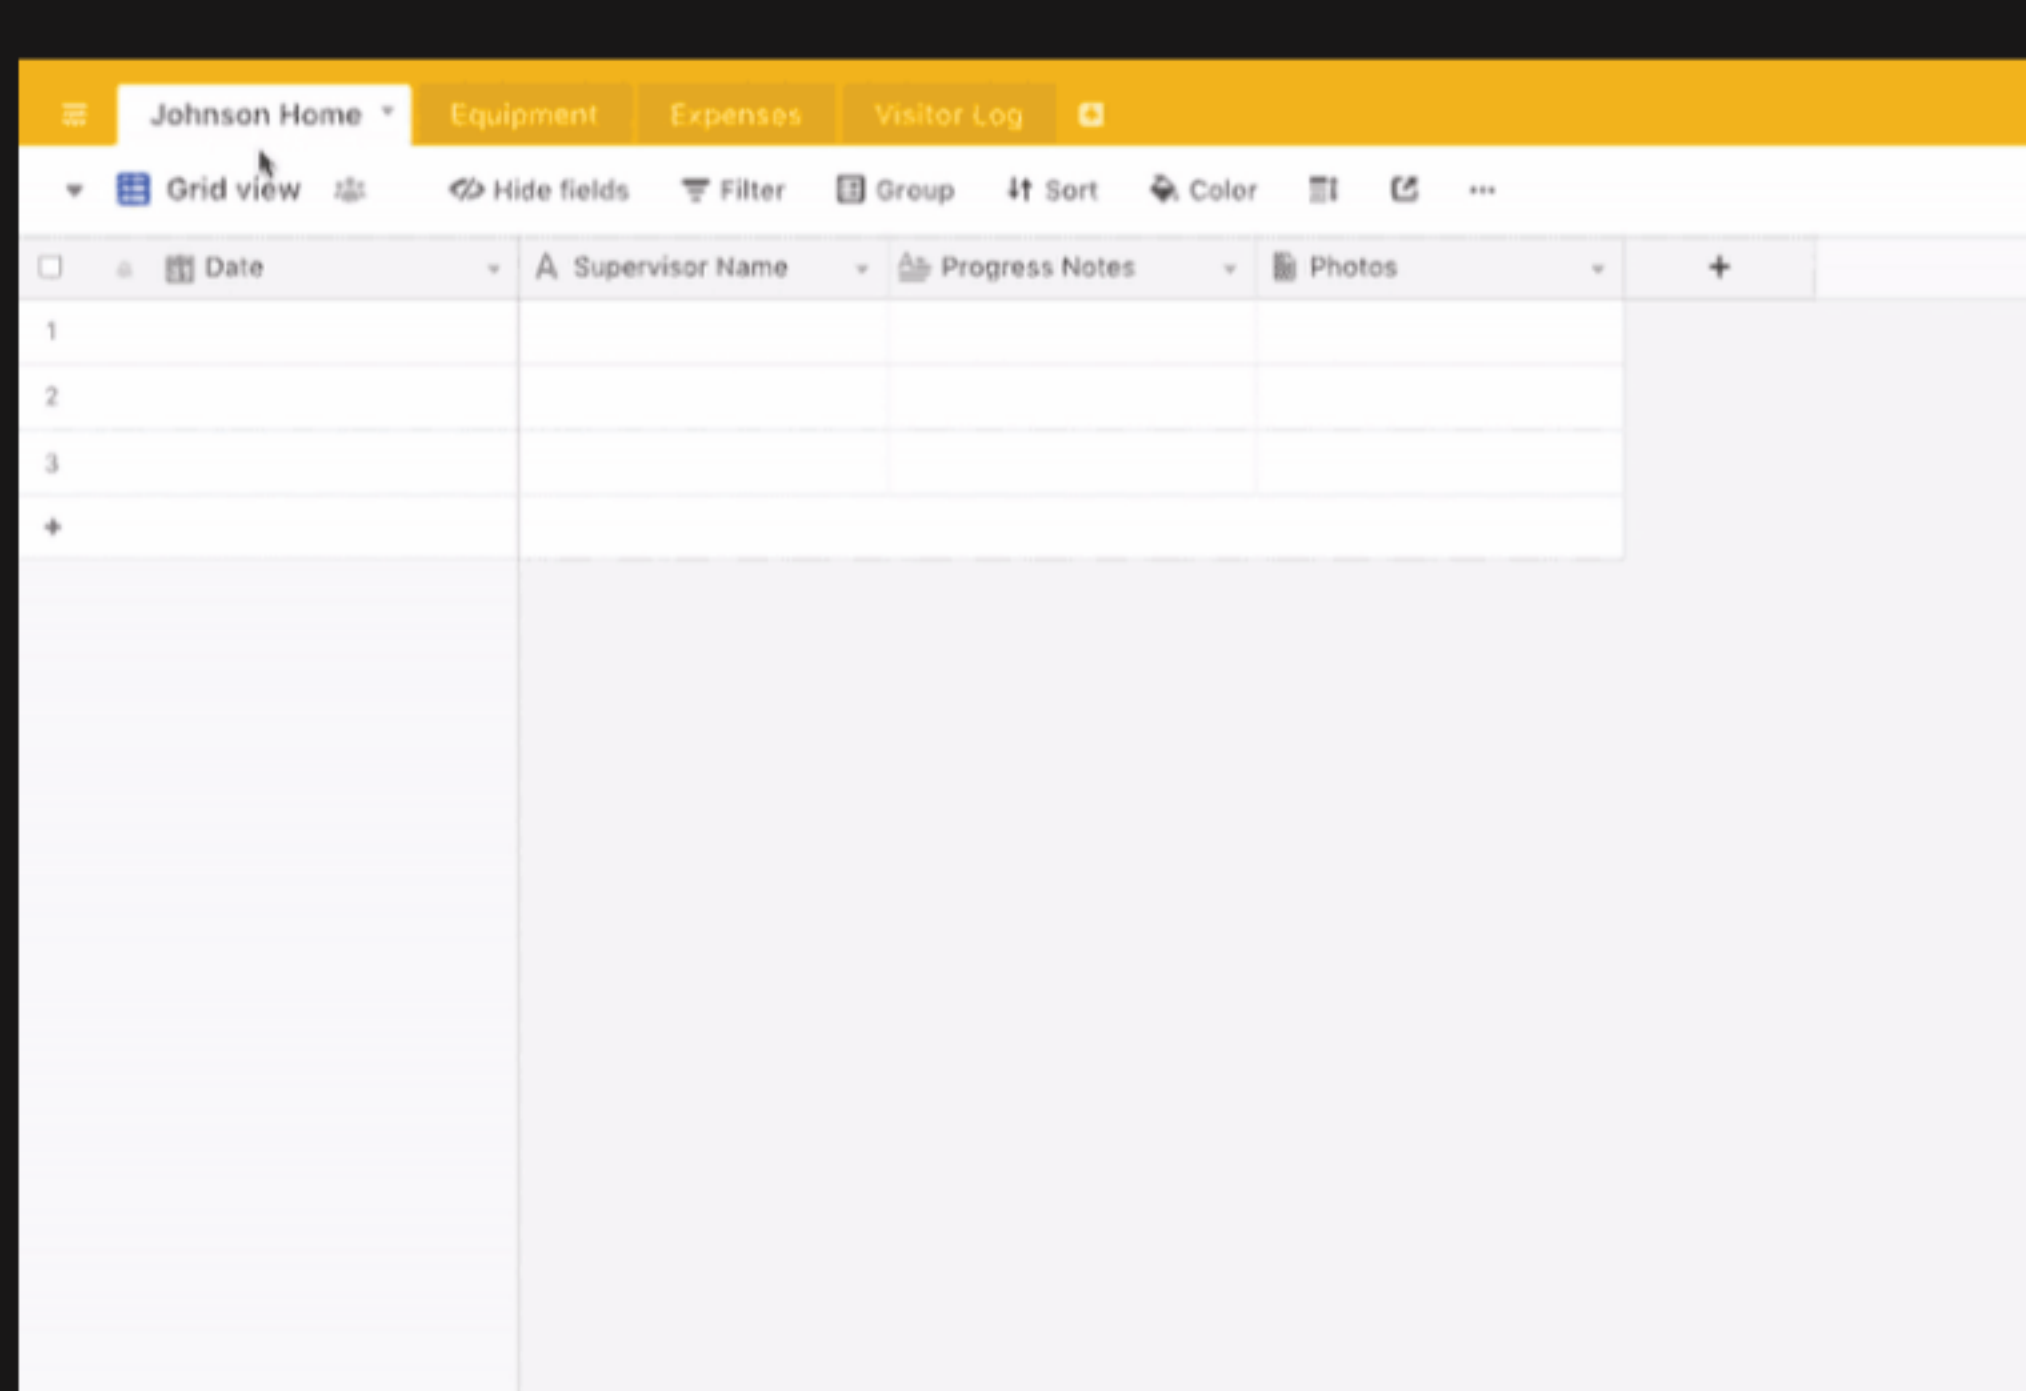

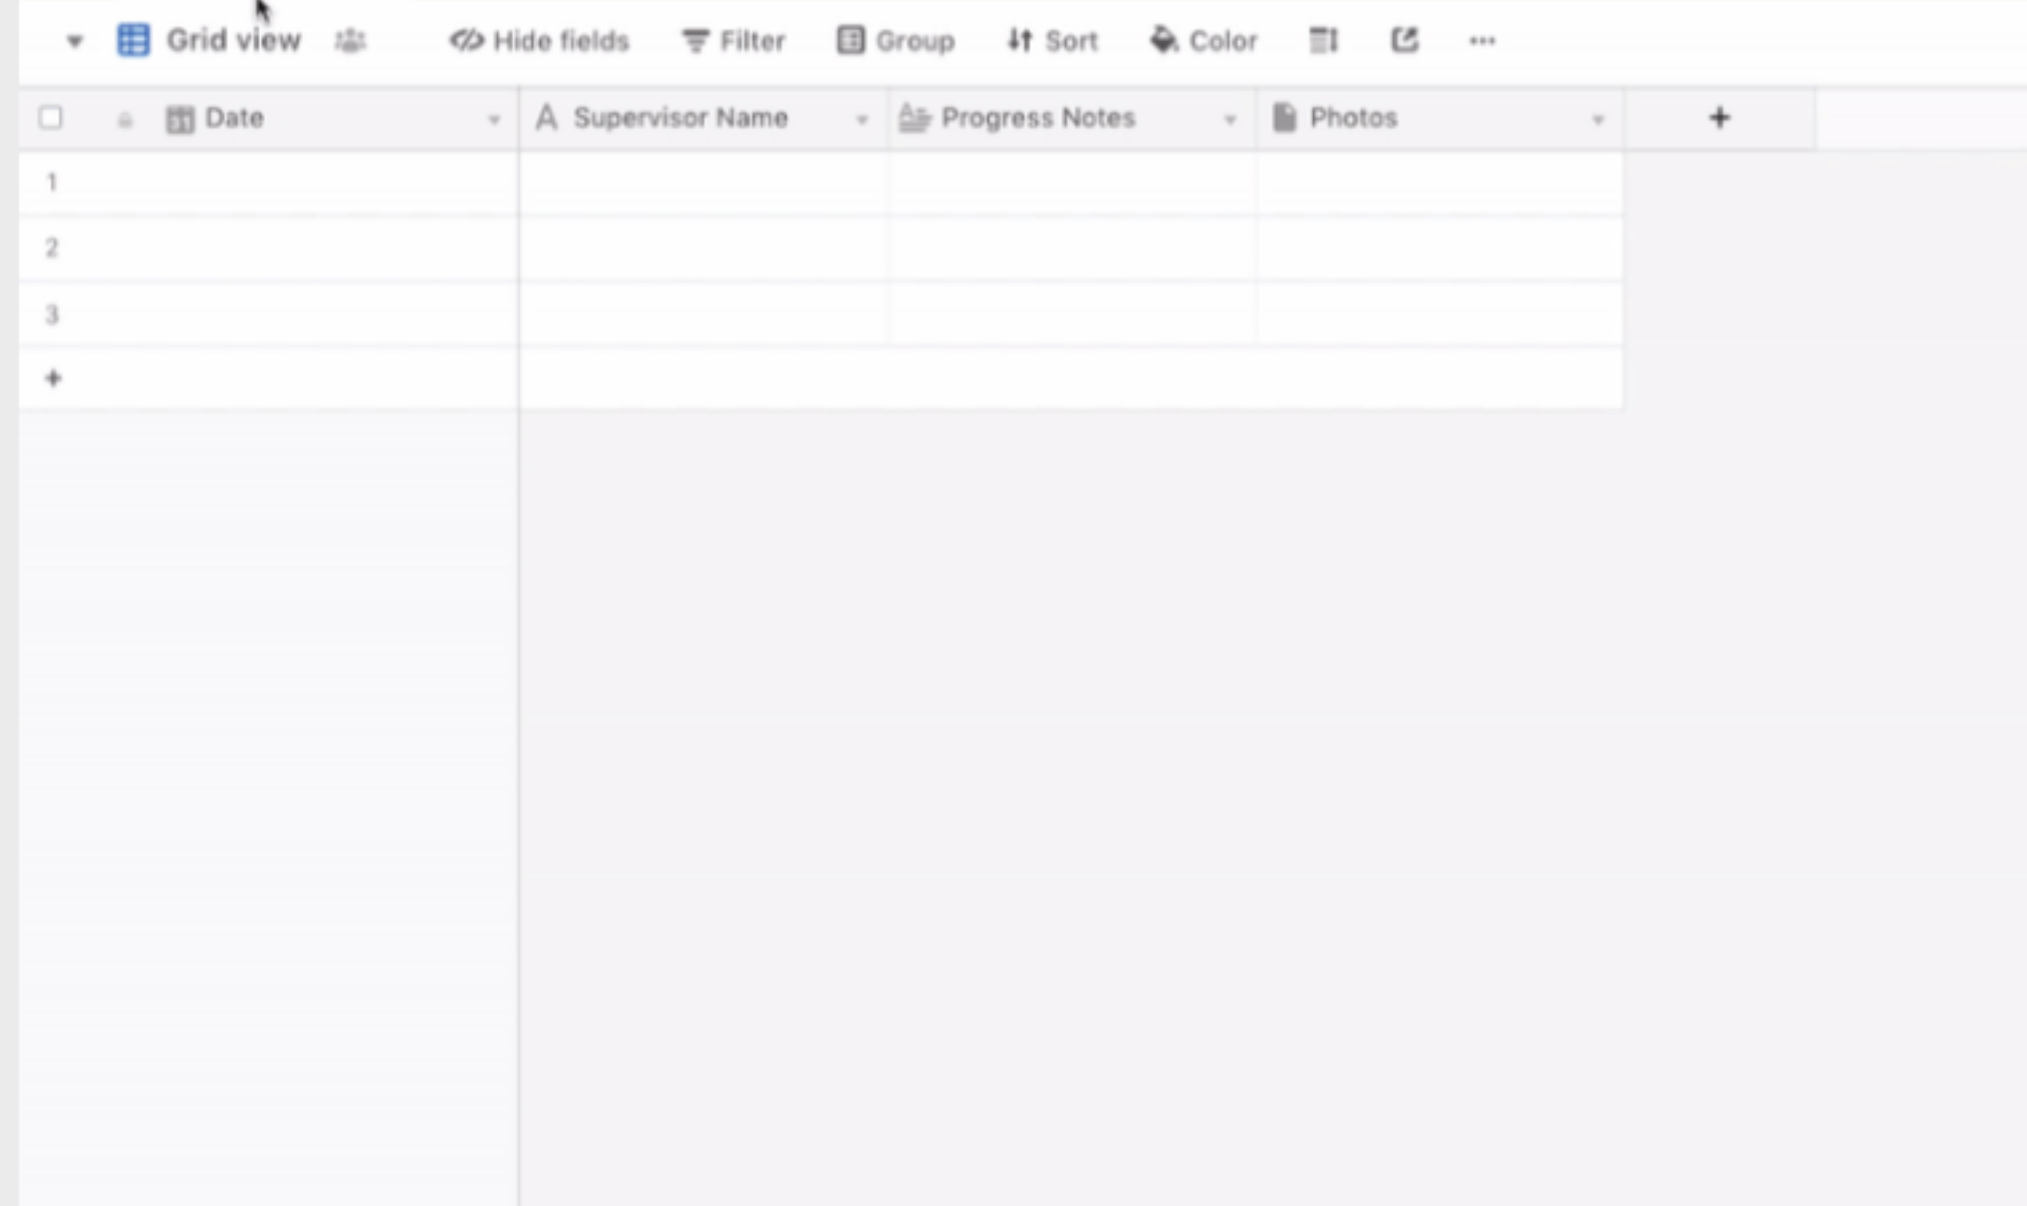

We can include as much, or as little as required for each project/customer. Then we can choose how and when they are notified.

Add as many tabs as we need to **Track all of Your Moving Pieces.**

Expand every project with multiple tabs and stay organized.

- Log your equipment use and know where everything is.
- Track your expenses and upload receipts for payment.
- Keep a record of all visitors or sub-contractors on site.

Every tab can be shared, or kept confidential from the client. We only send them what they need, when they need it.

Custom Forms enable all data to be **Entered Quickly and Easily.**

Supervisors don't have to worry about a complicated database... not with these **custom-build forms.**

- Forget the spreadsheet, we use forms to simplify data entry.
- Add or remove fields to streamline workflow.
- Forms are saved as links/web pages supervisors can bookmark.

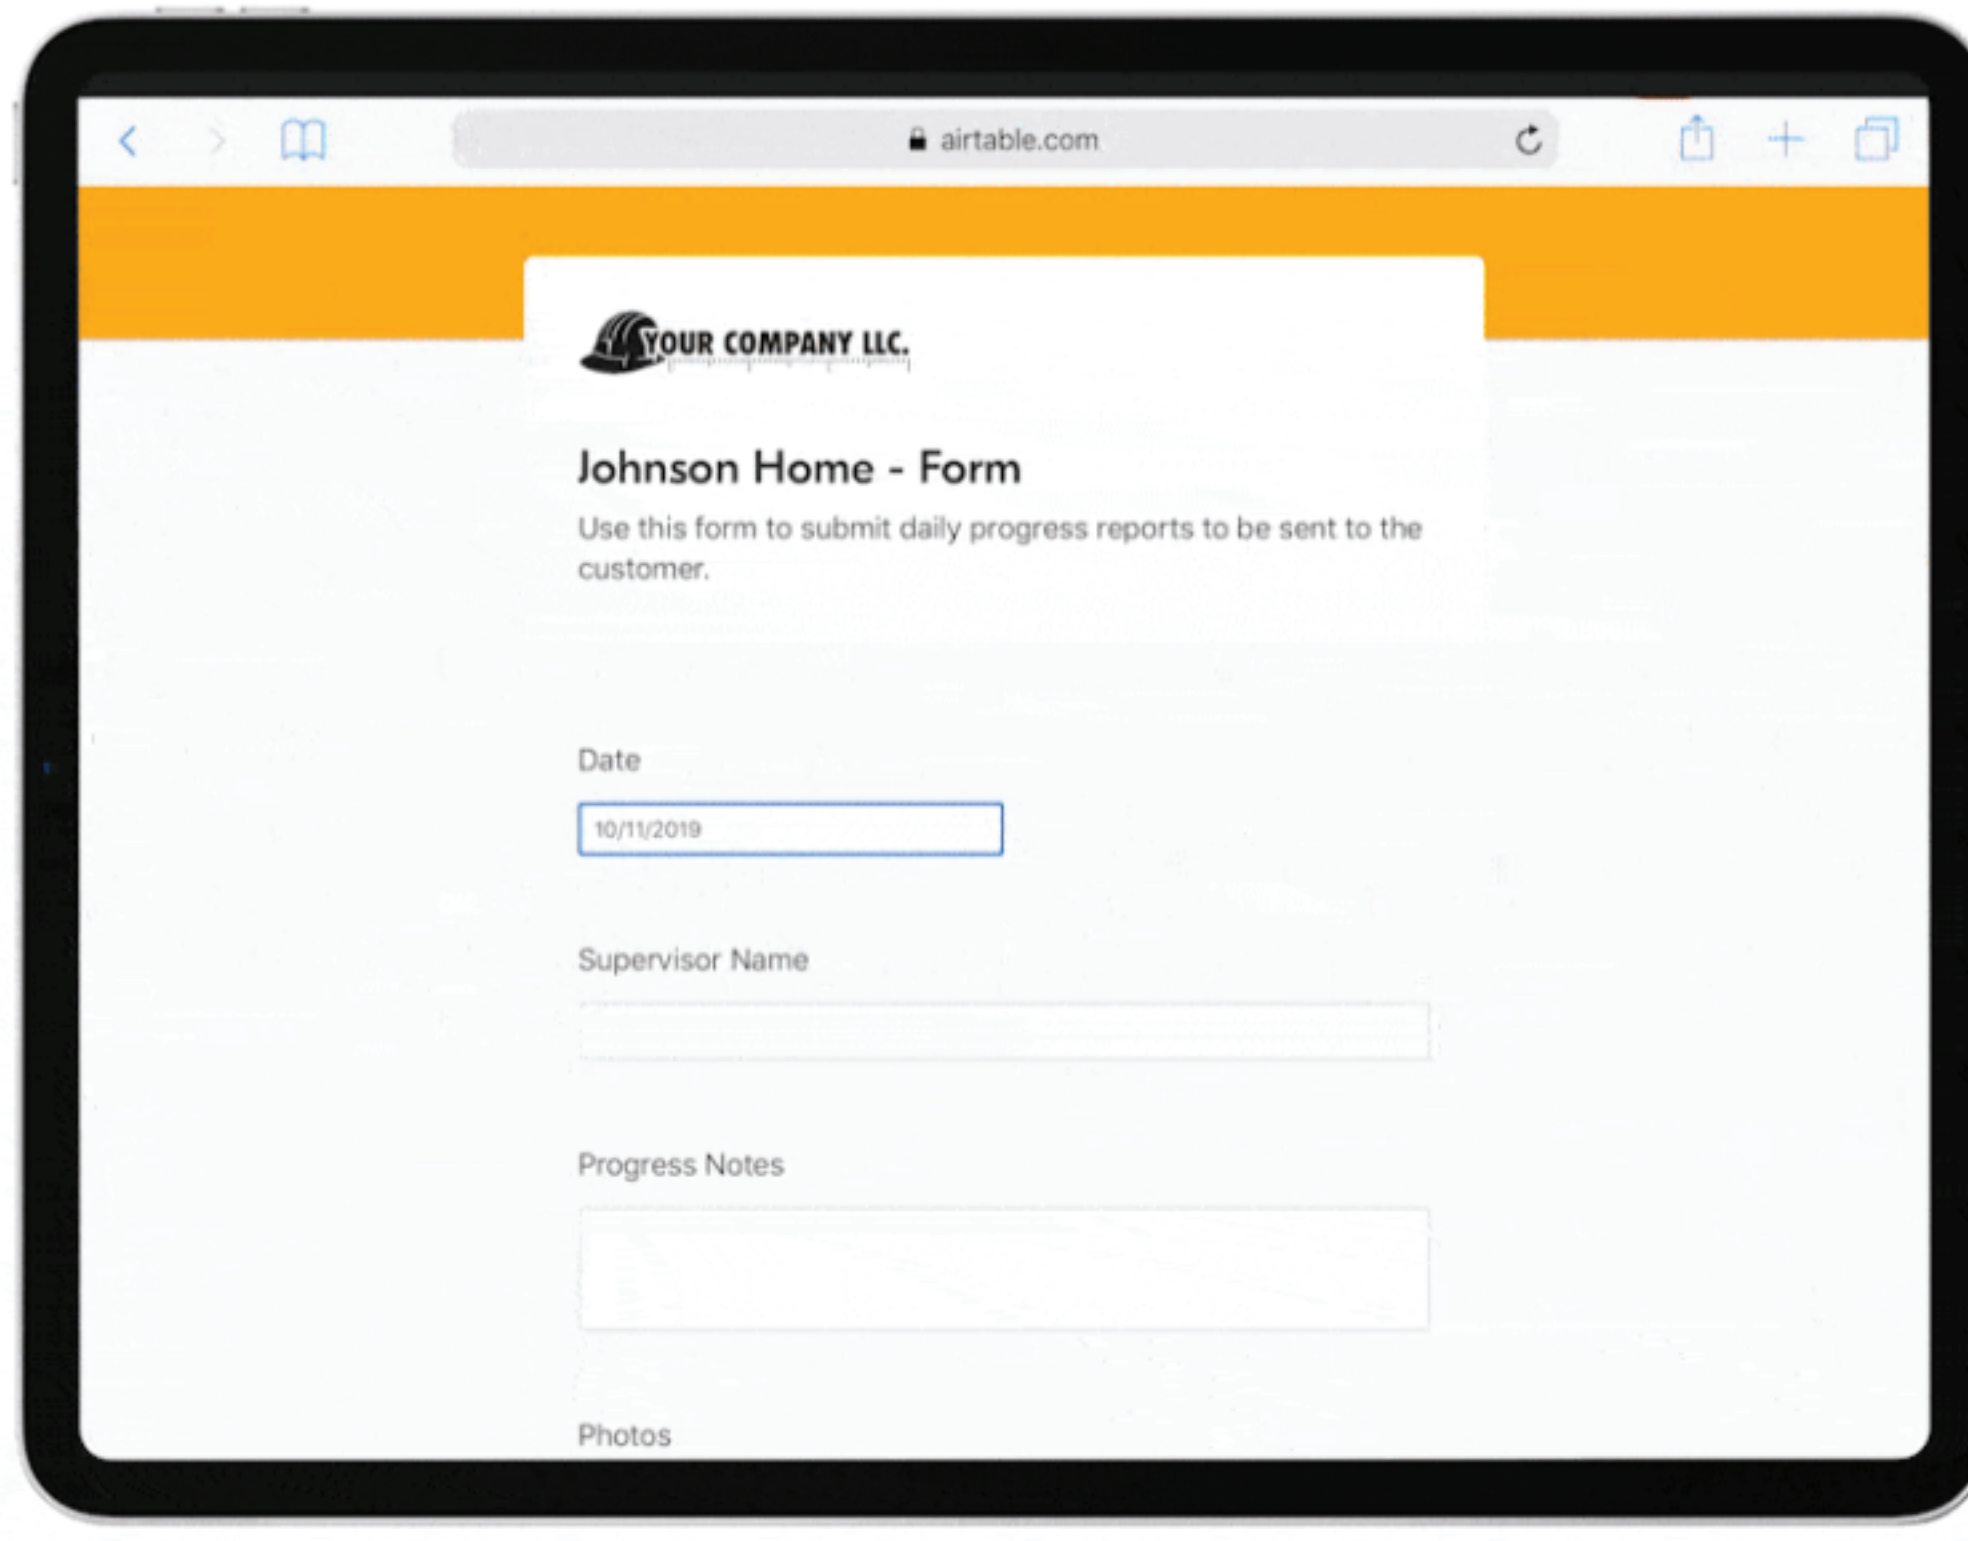

Everything is built to be straight-forward and as simple as possible. If you can send a text message, you can submit a form.

Submissions are Simple and can be **Published on the Go.**

All forms have been built for *smartphones* and *tablets.*

- The **"Fill In The Blank" Design** eliminates endless typing.
- Every submission is timestamped and assigned by name.
 - Add photos or videos with a single tap.

All forms submit directly to the database remotely, are cataloged by date/time then can be reviewed and shared with customers seamlessly.

Bookmark or Save forms to your home screen to **Create Your App.**

Forms can be saved and launched as apps, eliminating the need to keep up with random website links.

- Load the form one time and bookmark it for ease of use.
- Save to your home screen to function as a stand-alone app.
- Mobile forms can be accessed for any project, any time.

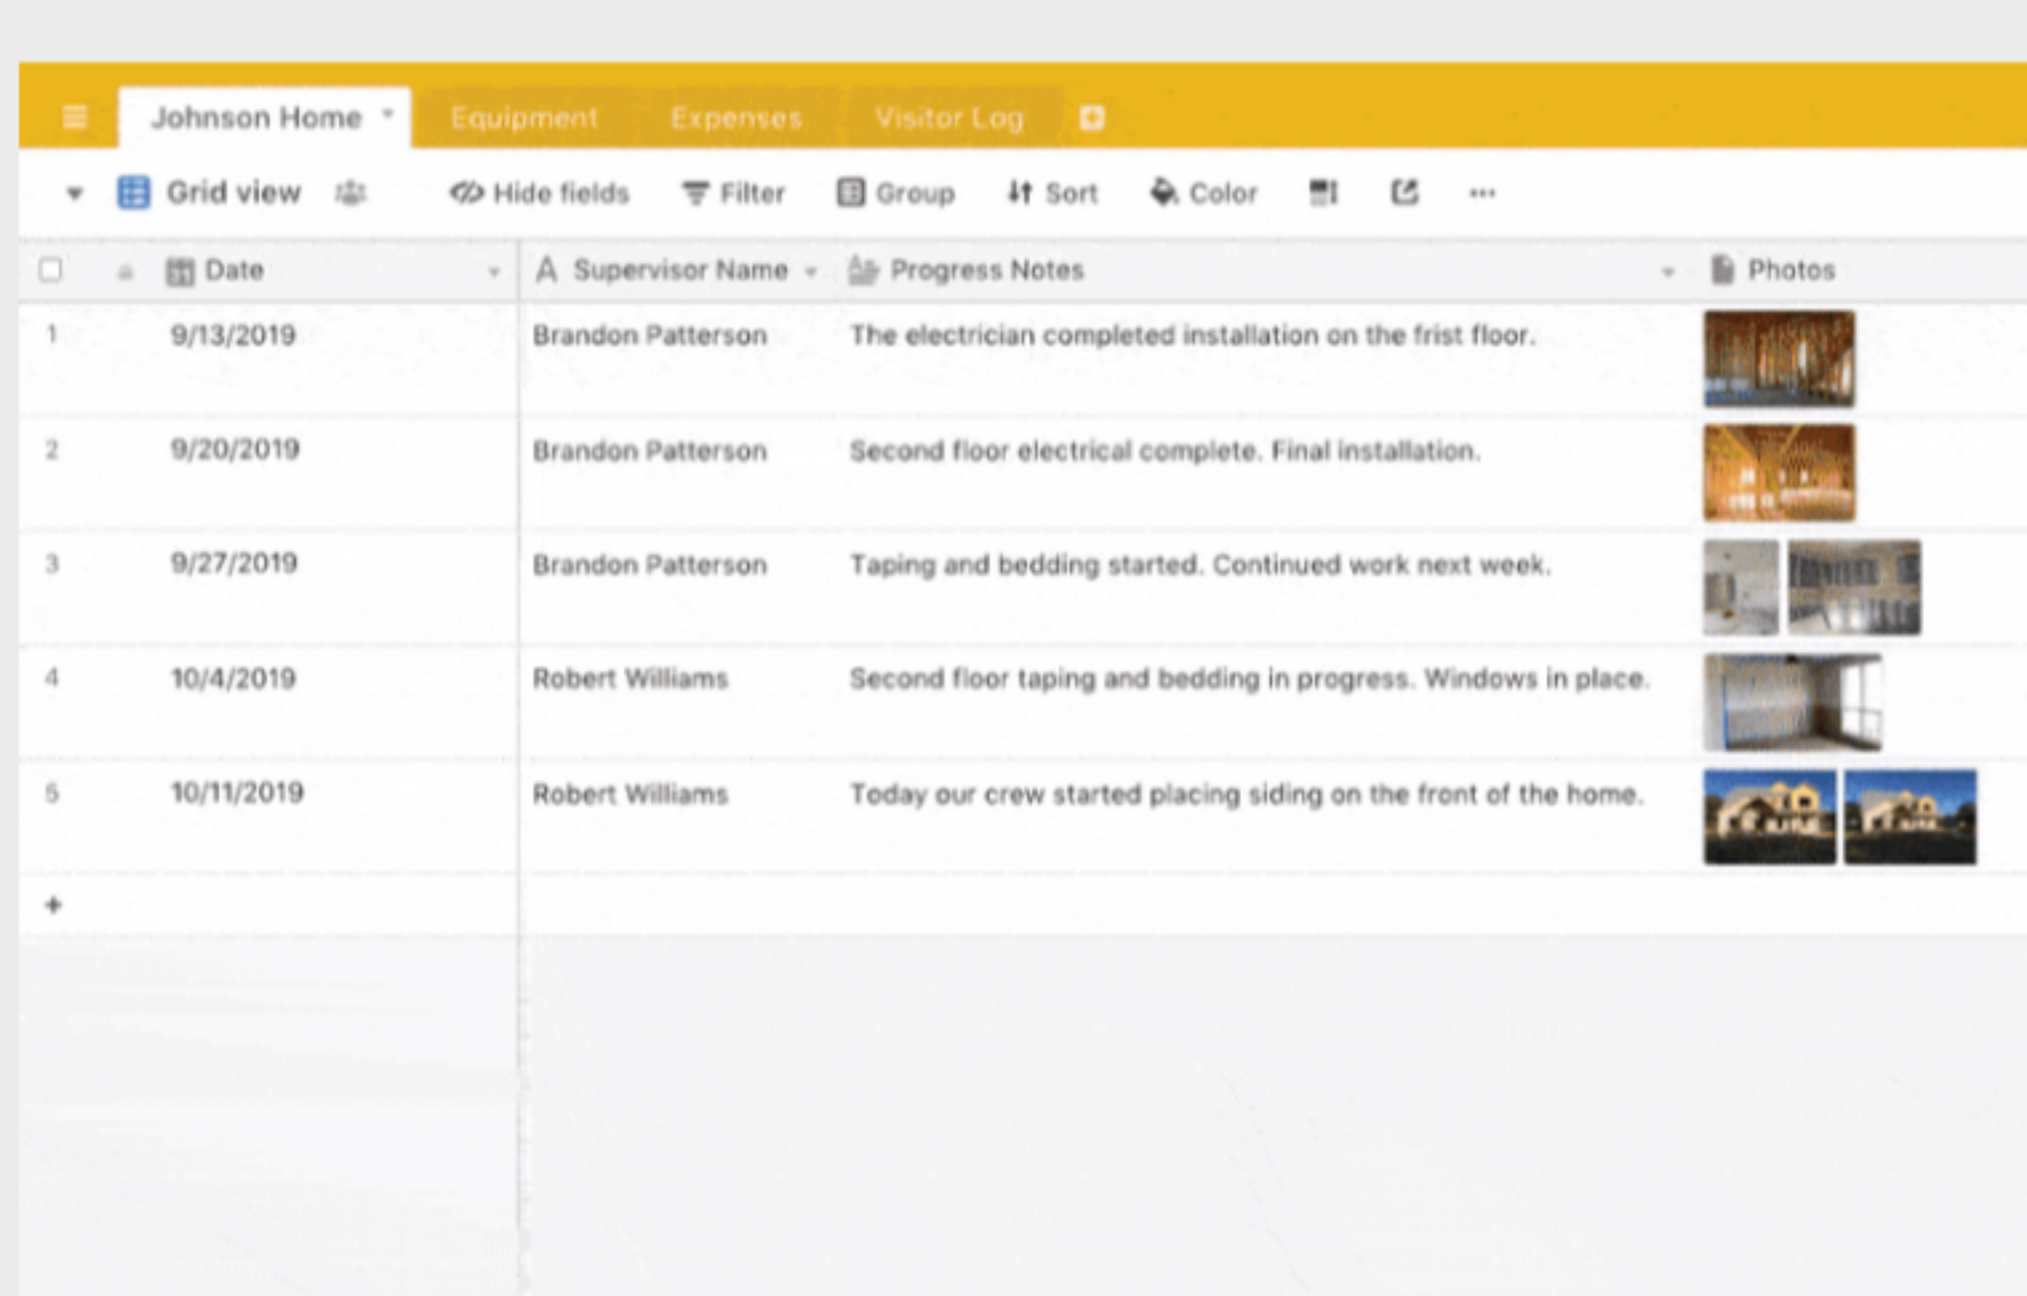

No need to carry around a computer, everything can work right on your smartphone or tablet.

Here's the fun part... Everything is **Organized and Stored in One Place.**

No more cluttered email inboxes or full voicemail boxes.

- Submissions are cataloged by date and project.
- Use the search function to find specific keywords, or you can filter what you see by date range or supervisor name.
- All attachments are stored in the cloud and accessible on your computer, tablet or even your smartphone for quick review and in-person customer meetings.

From Start to Finish, all progress can be easily tracked, presented and even exported into an Excel Document or PDF at anytime.

Working with insurance? No problem, share the database with the adjuster or export any information, any time.

Hey Mr. Johnson, a new status update has been posted on your home!

"Today our crew started placing siding on the front of the home."

Awesome! This looks great! Thanks guys

Streamline Taping and Communication with **Customer Alerts.**

This is where the magic happens.

- Your customers can receive an Email, Text Message or Both.
- Never leave them wondering what progress was made.
- Save them from calling you and free up your time with digital updates on a schedule you choose.

You decide what the customer sees, how often they are notified and how it happens. Give them more information, automatically and save time not having to be on the phone 24/7.

This is why we do what we do.

I've read enough... Let's get this thing rolling!

Additional Services

We offer a wide range of **Creative** and **Logistics Services** your company may like. Take a look below and select anything you might want to learn more about.

[ID Badges](#) | [Graphic Design + Branding](#) | [Company Website Design](#) | [Asset Tracking](#) | [Online Document Signing](#) | [Video + Aerial Photography](#)

ID Badges

Eliminate the need for handwritten timecards... with custom-printed ID Badges, your crew can walk on and off a project with a simple scan of the barcode. Using your app, setting up a new badge is simple and digital scanning handles the rest. Even subcontractors or visitors can be easily logged.

[I Could Use This](#)

Graphic Design + Branding

A company logo, apart from the quality work itself, is often what a customer remembers or recognizes the most. It represents the identity of your team and communicates your services to the public. Is your's outdated? Is it time for a refresh?

[Yeah, It's Time For An Update](#)

Company Website Design

It's no secret that today we live in a tech-driven society where the internet plays a huge role in how your company is found and where new customers search for examples of your work. If your site is dated, most likely your company may seem behind the times as well.

Let's fix that.

[We Could Use A Fresh New Site](#)

Asset Tracking

Handling a large-scale packout? Looking to manage customer belongings or high-value items? We have a digital tracking system that can help ensure everything is mapped from point A to point B, without a hitch. Using custom-printed barcodes, each box, piece of furniture or belonging can be safely labeled and securely logged.

[We Could Utilize This Now](#)

Online Document Signing

By using the powerful tools of **DocuSign** we are able to streamline all of your contract, invoice and purchase order needs. No more mailing documents or waiting for a handwritten signature, now you could offer everything through your website and speed up the entire workflow.

[This Would Serve Us Well](#)

Video + Aerial Photography

Nothing can showcase your work better than a video. With high-definition shots, dynamic angles only a drone could capture and stylish music... we can truly show off what you and your team can do. Check out the example video above and if you're interested, click the button below to tell us more about how we could highlight what you do!

[Wow, Let's Make A Video](#)

Let's Get Connected

If you have questions or would like to setup a meeting with our team... fill out and submit the form below.

We will send you a follow-up email and schedule a phone call to discuss details and pricing.

We look forward to working with you!

FAQs

What if I need certain aspects of my project to remain private?

That's no problem. Your customer, or the insurance carrier, only see what you allow them to see. During the building phase we will decide what is viewable and what is not.

I have several projects running at one time. How do we keep everything straight?

In this case we would build independant databases for each project. Using customer names, differing icons and most importantly, assigning different colors to each project will help keep everything organized.

My on-site supervisors often float between different projects, how would that affect the customer updates?

Not an issue. Every Supervisor or Project Manger, including yourself, can have an app saved for each project. If they want to post an update to a specific client that day, they simply open the corresponding project app.

I am not the most tech-savvy person, won't this just make my job more difficult.

No. We will work together through the entire process. First we will hold a face-to-face 15 minute training session where a member of our team will walk you through how to post an update or review project information. Plus, we are always on call or a text message away.

Can I share project information with more than just the customer themself? What about subcontractors or other interested parties?

Yes. We are able to generate private links to share as much, or as little, as we want with whomever we want. You can even set a project-specific password that would be require to view anything you send.

Does it cost extra to send emails or text messages to my customers?

Standard text messaging rates apply for those who do not have "unlimited" mobile plans. Also, third-party services are used to maintain constant communication with your customers. These include both [Zapier](#) for emails and [Avachato](#) for text messages. Both have standard fees they charge, but would be included in your original proposal of pricing and services before we begin.

Have another question you don't see here? Shoot it our way and we will send you the answer.
