

Art Projects for Kids

HALLOWEEN WITCH'S HAT

What You Need

- Template on following pages
- White paper or card to copy template.
- Scissors and glue stick.
- Thick black marker.
- Bright watercolour paints
- Paintbrush

To prepare

- Print templates below. These have been created as smaller artworks, not for wearing. If you want to create wearable hats enlarge the templates as much as you can.

The Project

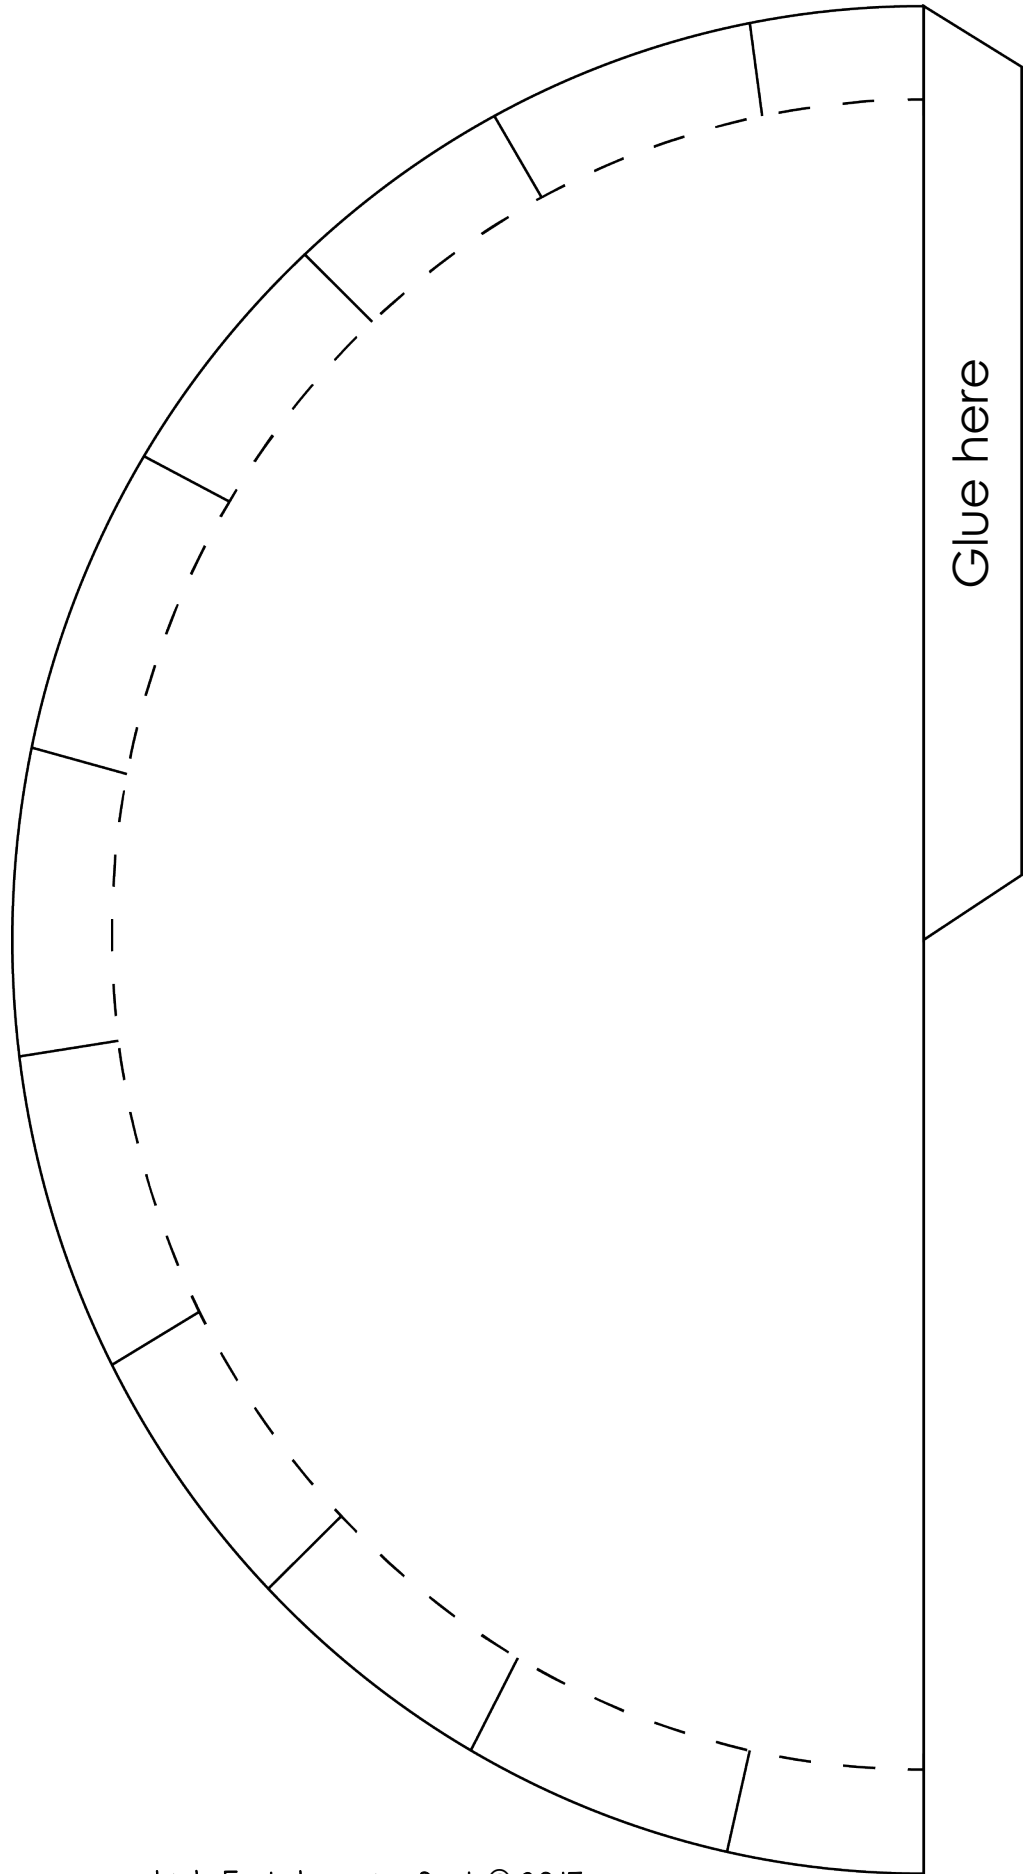

- Cut out templates. Cut all solid lines and fold on dotted lines.
- Lay recycled paper or newsprint down to protect the table from paint.
- Use the black marker to draw random crossing lines across both shapes.
- Use watercolours to paint each of the white areas formed by the black lines then leave to dry.
- Put glue on tab, twist paper into a cone shape and glue 2 edges together.
- Place on table with small tabs folded out.
- Put glue on back of ring shape then pop it over the cone and press down onto tabs to firmly glue the hat brim in place.

To display

- They look terrific when the brim is glued to black card and displayed on a wall. It's like having a top-down view with the cone facing the viewer to give an interesting 3D effect.
