

SHIREMAN ESTATES

P.O. Box 268, Old State Road 37 North, Martinsville, Indiana, 46151

May 24, 1973

Dear Lot Owner:

It gives us great pleasure to let you know that Lake DeTurk will be open for fishing beginning May 26, 1973.

We do have more work to do on the beach area on the west side of the lake. The beach area at the north end - we will have to work on late summer and early fall when we can pull the lake down some.

Please help us to keep the lake clean and every outsider from fishing unless he is a guest with you. This is for everyones benefit in Shireman Estates.

Thank you,

Ed Ferguson

SHIREMAN ESTATES

P.O. Box 268 Old State Road 47 North Martinsville, Indiana 46150

April 29, 1974

Dear Lot Owner:

Following are the restrictions for Lake DeTurk:

1. The only people with permission to use the lake are lot owners, their immediate family, or their guest.
2. No guest or outsider may use lake unless he is with lot owner or a member of their immediate family.
3. No motor boats, except electric trolling are permitted on the lake.

We do have more work to do on the North beach area. We will have to work on late summer and early fall when we can pull the lake down some.

Please help us to keep the lake clean and every outsider from fishing. THIS IS FOR EVERYONES BENEFIT IN SHIREMAN ESTATES.

Thank you,

Grassyfork Fisheries Co., Inc. intends to lower the level of Lake DeTurk this August for the purpose of doing some improvement around the shore lines. It is anticipated that water will start being dropped August 1, 1974. It will be lowered approximately 4 feet from its present elevation. This will be an excellent time for people owning frontage lots to do any improvement work they have in mind on their own lots.

It is anticipated that two months will be sufficient for carrying out the intended work which is primarily to clear out around the inlet area. However, this depends much on the weather and excessive rains at the time would obviously delay matters. Normal winter precipitation will refill the lake.

We are curious about fishing techniques used on Lake DeTurk. The valley it is in was formerly one of the most productive portions of the hatchery, it was stocked with minnows for feeding game fish and then game fish themselves. We know there are at least 15 bass in Lake DeTurk that run over 10 pounds each. Are they out foxing you? What about the 34 pound cat fish?
