

# MARCH

## PreSchool News

**Dear parents,**

**I hope you enjoyed spending quality time with your little ones during the midterm vacation. I would like to send my thanks to all the parents who volunteered their time and came in to read with our students. We are looking forward to more involvement and participation. There will be more opportunities coming up! Stay tuned to the announcement on ClassDojo for further information.**

**This month we will be continuing studying “Trees” and “Insects” as the children are showing a great interest in those topics. We will look closely into the different types of trees and leaves, trees as a habitat for animals and bugs, and their ecological importance. Alongside, we will continue our insect investigations.**

**To maximize the learning experience, and relate it to our daily life, please have the children pick items related to the study for the show-and tell. Thank you for your cooperation.**

**Math:**

**We will continue with classifications and sorting concepts. We will also introduce patterns, comparing and charts.**

**Furthermore, we will extend counting up to 20, number recognition, and we will continue practicing simple adding and subtracting concepts through songs and games.**

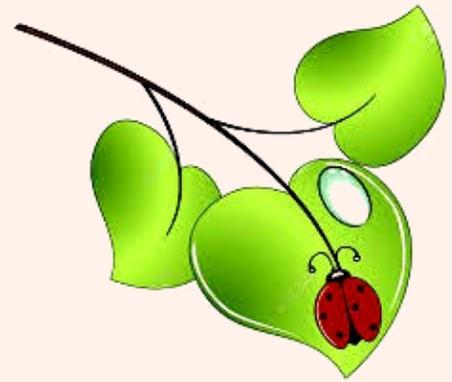

### **Language:**

**We will be adding new words to our vocabulary related to the subject. We will also continue with rhyming, practicing writing our names, and letter recognition.**

### **Science:**

**We will be studying all about the different types of trees, insects, and how they help sustain ecology. We will also be starting to introduce the concept of recycling, and how trees help the environment and animals. Furthermore, we will be exploring the different shapes and types of leaves, insects and their habitats.**

### **Social Emotional :**

**We will be providing a variety of group activities to promote social competence and collaborative work, we also will be studying using our senses for richer learning experiences. We will continue supporting self-expression and confidence by using words and strategies during problem solving and conflict time.**

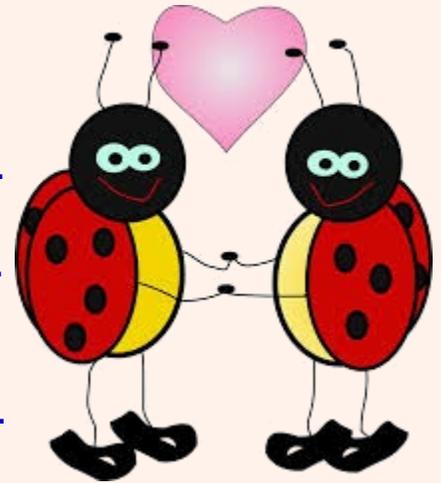

## **Parent participation:**

**I would like to thank you for showing interest in being part of our classroom for mystery reader and career week.**

**As I mentioned before, volunteering is a great way to begin growing the relationship that you have with your child and the school. Your presence in their school environment helps their social emotional development and self-esteem. They learn how to better interact with their peers and regulate their emotions. Their cognitive development also improves drastically. This will maximize their overall learning experience and grow the bond between school and home. We will be starting volunteering in our classroom once a week. I will inform you with the day and any further information. It will be throughout the rest of the school year. A sign-up sheet will be available online by the end of the first week of March.**

**For maximizing the learning experience, I would like to suggest to relate your activities to the studies that we have, if you have any questions regarding the ideas please contact me via email.**

**I'm very excited to explore with the children the great activities that you will bring to the classroom.**

## **Important Dates:**

**3/10 : Hakawy Trip**

**3/18 : Mother's day celebration.**

**3/26 : EC/ES International Trading Day.**

**3/31 : Pizza Day**
