Copyright and Plagiarism

What do these words mean?

We have no idea!

?

Think about this...
You write a song and share it with your best friend. A few months later you hear the song on the radio. Your best friend stole the song and said it was his. Now he is a millionaire and lives in a mansion.

How do you feel?

How do you feel?

Most likely you feel mad, upset, unhappy, cheated. That was YOUR song and someone stole it!

Your best friend took **credit** for your awesome song.

So what is copyright?

Copyright is a type of protection given to anyone who creates something. This includes writing, art and music.

So what is plagiarism?

Plagiarism is copying text, images video or anything else someone else has created without giving credit to that person.

Why is plagiarism wrong?

>>> It is disrespectful to the person who created the work.

>>> Plagiarism is stealing.

>>> Plagiarism is cheating.

>>> Plagiarism is illegal.

What does this have to do with me?

If your teacher asks you to write a report or complete a project, she wants the work done by you. She does not want you to copy words out of a book or copy and paste from a web site.

So what do I do?

>>> Give credit to the person who created the work.

>>> Summarize the words (put them into your own words.)

>>> Keep track of your sources (places you found the information.)

>>> You must give credit for any images or music you use as well.
