LOVED BY TEACHERS

"Fantastic resources upon resources!! A great unit that is very well organized with tons of information. The kids learn an awful lot (as did the teacher the first time I used this). Great kid friendly texts, diagrams, and activities. One of our favorites each year is the "photosynthesis play." Very creative way to learn something a bit difficult to understand at this age!"

-Michelle D

"I love how detailed this unit is! The lessons and experiments are great and fit exactly what I was looking for! Thank you!!!"

-Teacher Turned Triplet Mom

"I absolutely LOVE this product! I am jumping into the NGSS standards on my own, and this really helped me out. I was also hoping to find some independent activities I could leave with a sub during several district trainings, without sacrificing valuable instructional time, and there were SEVERAL things I could leave.

Thank you!"

-Theresa M
