

# i-Moon Craftivity

## Moon Phases

An i-Phone  
Craftivity  
to Explore  
our Moon  
and its  
Phases

# Teacher's Page

This craftivity was created to put a little fun into your lessons on the moon. Depending on your preference, you can print on color paper or print on regular paper and have the students color it. I have provided two different pages of apps for you to choose from or mix and match. This will depend on your curriculum and classroom needs. Simply copy, and then have them cut out the “apps.” Then have students glue down just the top portion where it folds on the dotted line. Under the flap have students write facts about that particular app. Students can then color the iPhone and/or cut it out. Finally, if desired, provide students with the practice sheets to practice identifying the phases of the moon. It is my hope that your students will not only benefit from this activity that reinforces these concepts, but will also enjoy it.

Bottom Piece. Glue the apps on the "glue here" place. Then provide facts about each phase under each app.

# Moon Phases Apps

Directions: Shade each moon according to its phase. Then cut each out and fold on the dotted line.

# Not Finished By Moon Phases

Name \_\_\_\_\_

Look at the Moon cycle below. Shade the moon according to its phase. Then label it.
