

Review & Practice

The Solar System

Circle Book

Teacher's Notes

Thank you for purchasing this resource. I hope your students enjoy this activity. It will make a cute display and allows for an educational activity in your classroom.

Some important information:

- 1.) I provided many different circles related to the solar system. You can choose to use all of them or just some of them.
- 2.) I left the circles open-ended to meet your class' needs and to allow for more a research-based setting, if desired.
- 3.) Coloring can be a bit time consuming but creates a great visual. You may wish to have students take the circles home to color ahead of time or work on it in class when they finish work early.
- 4.) None of the pages inform the students of how to assemble the circles because I wasn't sure which circles you would choose. Therefore, I'll need you to inform the students of how to assemble the circle books. It's relatively quick and easy.

How to assemble it:

- 1.) Fold the pages you are using in half up and down (or hot dog style).
On most pages, there is a vertical line.

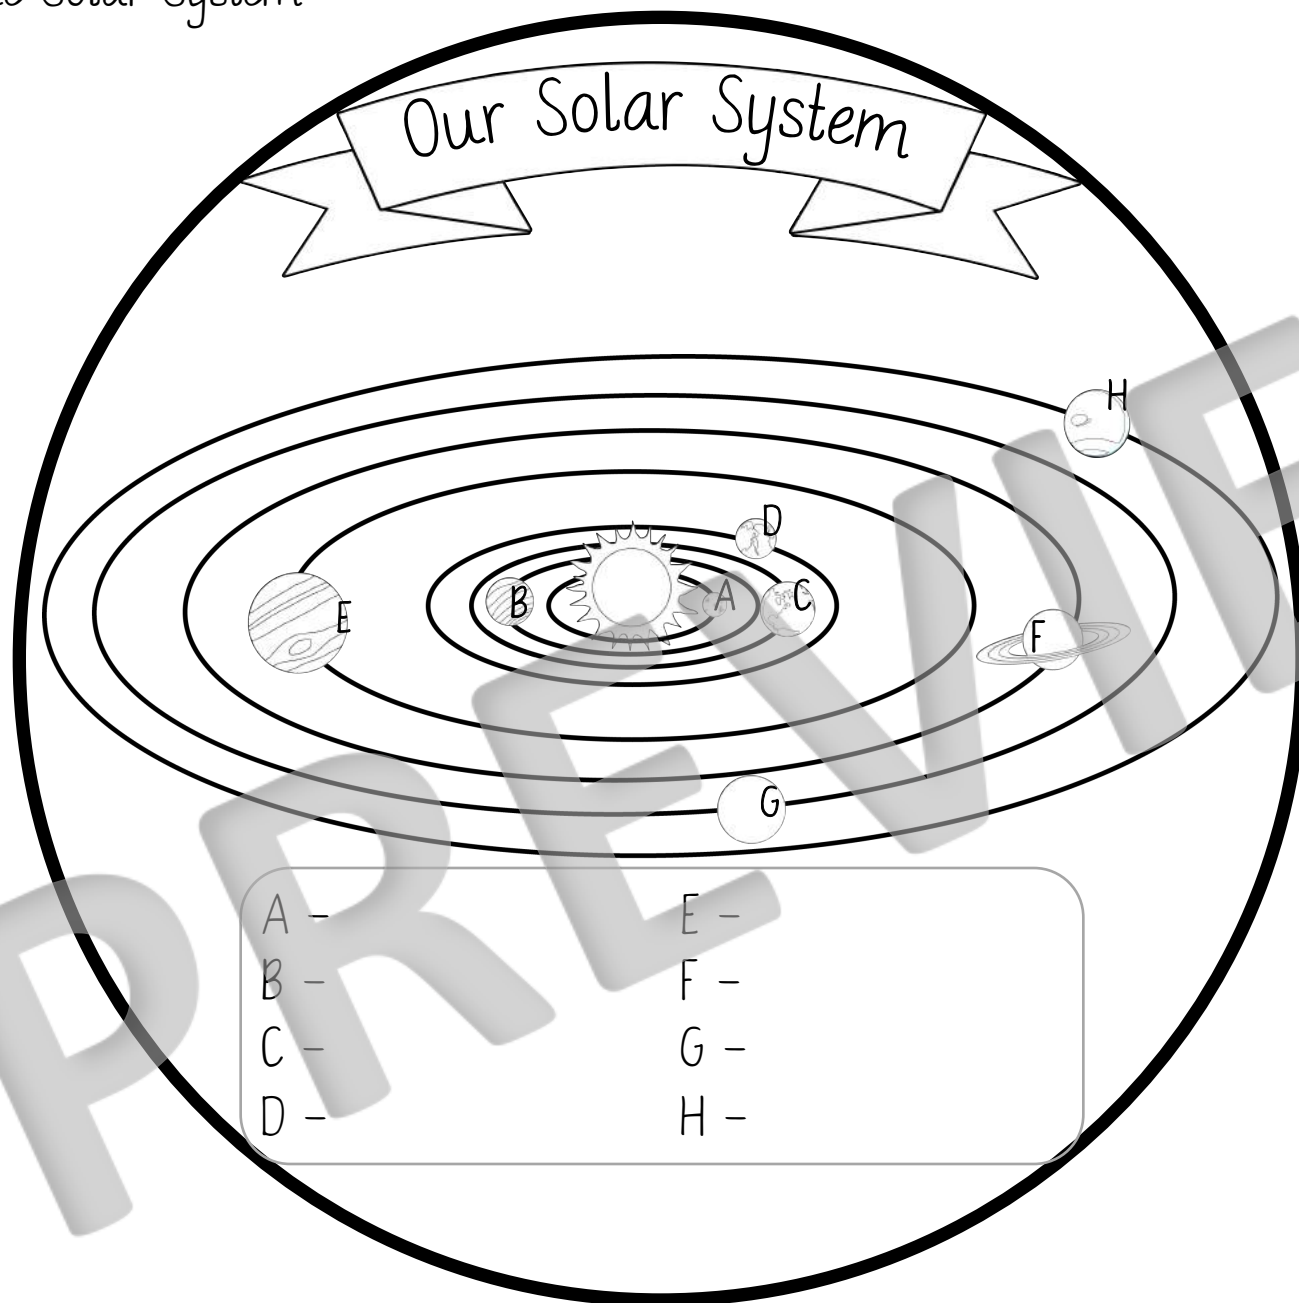

- 2.) Then on the back of one folded half, place glue. Place the back of another half on the half with glue. Make sure that it is the next piece in the order desired. Line up the halves well.

- 3.) Continue doing this with all halves until you have no more left to glue down. Place a piece of yarn or string in the binding folds. I always tape it to stay. See the picture below. Then you will place glue on the back of one of the halves glued down and pull it toward the other side to complete the 3D circle.

The Solar System

Circle Directions:

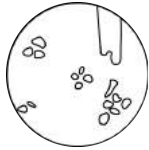

- 1.) Next to each letter below write the name of the planet.
- 2.) Color the picture.
- 3.) Then, cut out the circle.

The Solar System

Mercury

Placement from the sun:
(circle one)

1 2 3 4 5 6 7 8

Type of planet:
(circle one)

rocky gassy

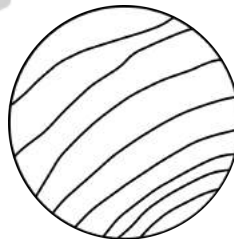

All About Venus

Placement from the sun:
(circle one)

1 2 3 4 5 6 7 8

Type of planet:
(circle one)

rocky gassy

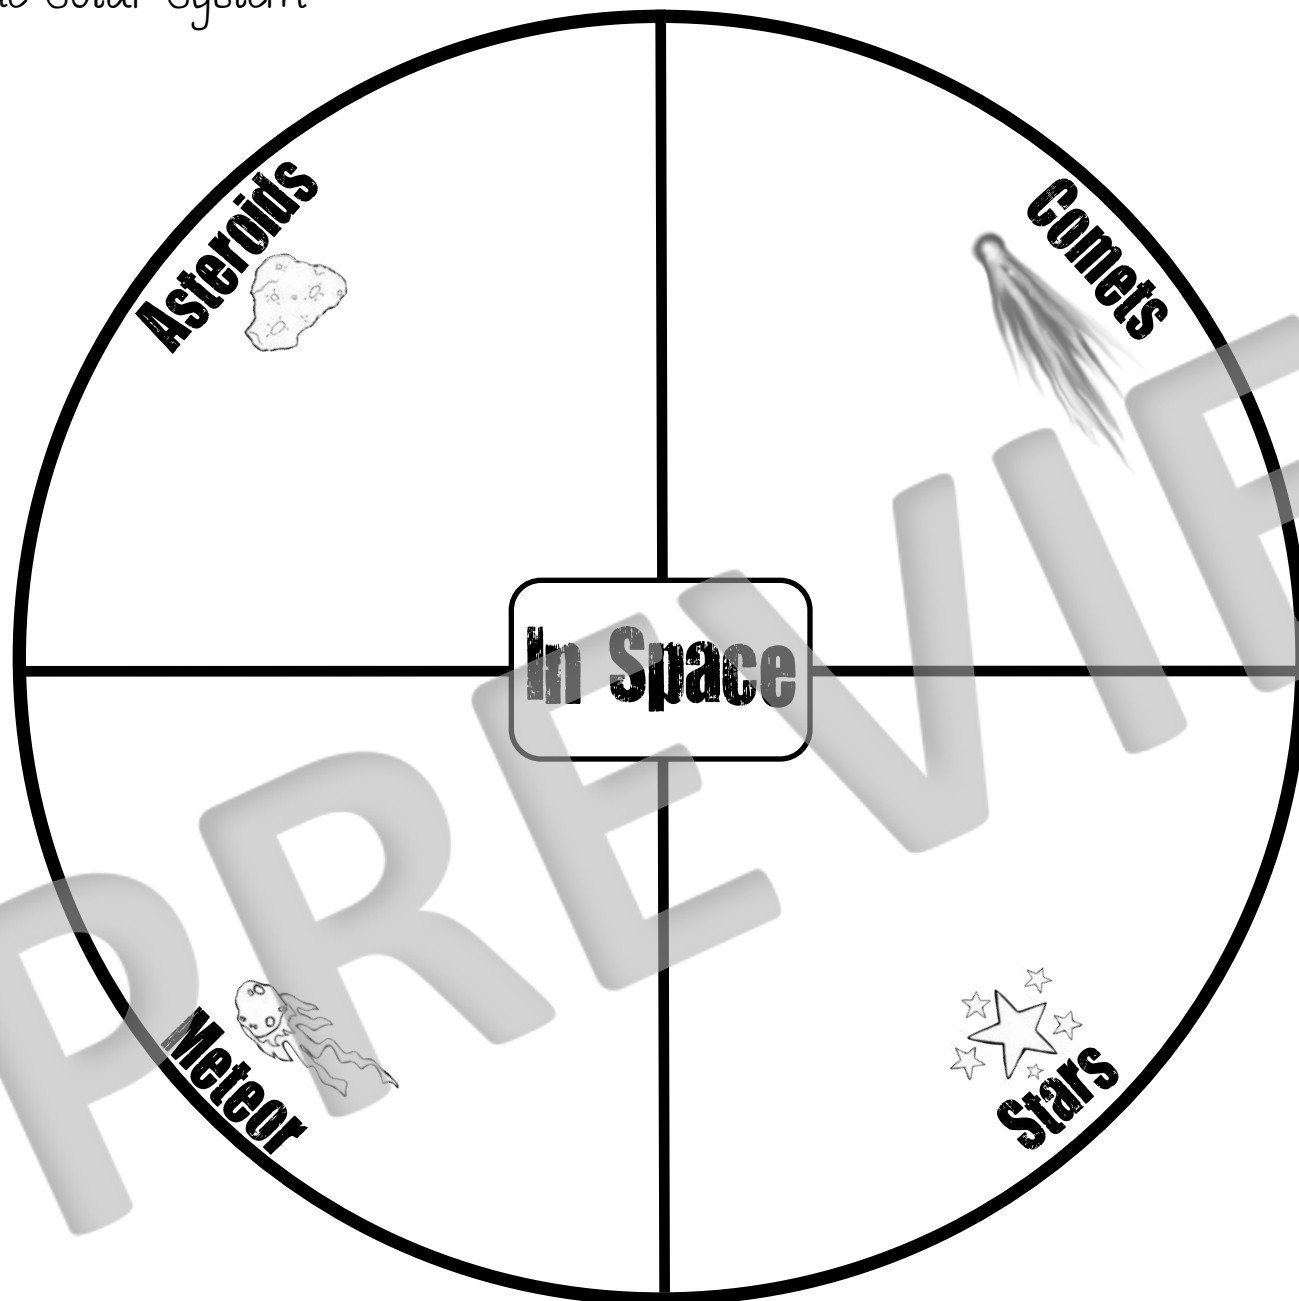

All About Mercury

Venus

Circle Directions:

- 1.) Read each statement about the planets and circle the correct answer.
- 2.) Write on the lines information about the planet.
- 3.) If desired, color the pictures.
- 4.) Then, cut out the circle.

The Solar System

Circle Directions:

- 1.) In each quarter, describe that space term.
- 2.) Add color, if desired.
- 3.) Then, cut out the circle.

The Solar System

Circle Directions:

- 1.) In each quarter, describe that planet.
- 2.) Then, draw the planet and color it.
- 3.) Cut out the circle.
