**TERM CAPTURE**

**Directions:** Spin the wheel below using a paper clip and a brass fastener. Find its matching definition on the game board and draw a line between two dots surrounding it. When a line forms a complete square, you are "capturing" it and get to color it in with your color. Take turns until all the squares are colored in. The player with the most squares "captured" wins.

**Definitions:**

- A collection of billions of stars.
- A natural or artificial object in space that circles around another object.
- A mixture of frozen gases, ice, dust, and rock that moves around the Sun.
- Meteoroids that enter the Earth's atmosphere but don't reach the ground.
- A large object that orbits a star.
- A medium sized star at the center of our solar system.
- The path one object takes around another object.
- A rock or meteoric object that orbits the Sun.
- Meteoroids that land on the Earth's surface.
- Patterns in the stars.
- A spiral galaxy that our solar system belongs to.
- One complete trip around the Sun.
- Small objects in space.
- Planets that are closer to the Sun and have surfaces made of rock.
- The Sun and everything that orbits around it.
- An object in space that produces its own energy, including heat and light.
- Earth's natural satellite.
- Everything that exists throughout space.
- Planets that are beyond the asteroid belt and have surfaces made of gases.
- An instrument that measures the distance to distant objects that seem large.
