

Review & Practice

Anything Goes Cards

Number Sense

Created By The Owl Teacher

How This Works

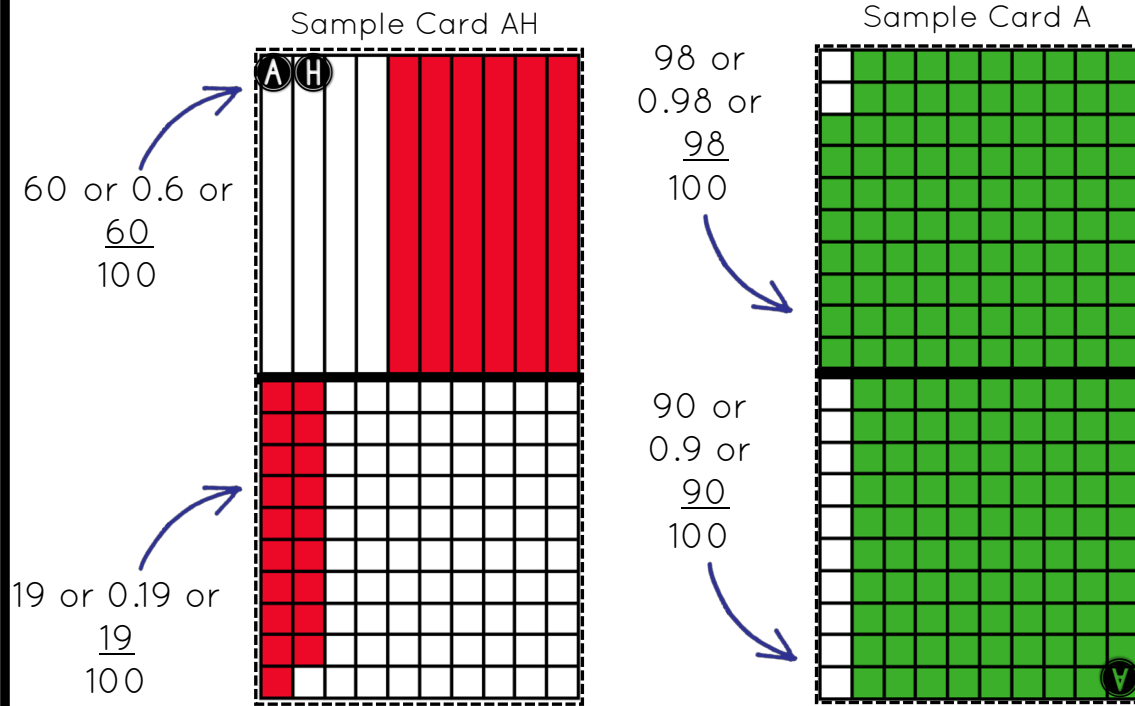

This is card A. Here are some of the math problems you can do with it:

- 1.) Add whole numbers.
 $98 + 90 = 188$
- 2.) Subtract whole numbers.
 $98 - 90 = 8$
- 3.) Compare whole numbers.
 $98 > 90$
- 4.) Create a fraction.
 $90 / 98$ (and then simplify it, or create an equivalent one)
- 5.) Add decimal numbers.
 $0.9 + 0.98 = 1.88$
- 6.) Subtract decimal numbers.
 $0.98 - 0.9 = 0.08$
- 7.) Compare decimal numbers.
 $0.98 > 0.9$
- 8.) Multiply whole numbers.
 $98 \times 90 = 8,920$
- 9.) Multiply decimal numbers.
 $0.98 \times 0.9 = 0.882$
- 10.) Divide whole numbers
 $98 \div 90 = 1.089$
- 11.) Add fractions
 $90/100 + 98/100 = 188/100 = 1 \frac{88}{100} = 1 \frac{22}{25}$
- 12.) Subtract Fractions
 $98/100 - 90/100 = 8/100 = 2/25$

You could even do the inverse, using the uncolored portion or mix and match with colored vs uncolored.

How this works

- The cards can be read in any direction.
- You can use the cards as whole numbers or decimals. You could even use them as fractions in most cases.
- You can have your students compare numbers, add, subtract, multiply, or divide. You can also have students create word problems.
- Have students put more than one card together for an extra challenge and/or larger numbers.
- Extra blank cards are included in case you want to create your own.
- Perfect for centers!

There is two cards here- card AH and card A. Here are some of the math problems you can do with them (there are definitely more!):

- 1.) Add whole numbers.
 $98 + 90 + 60 + 19 = 267$
- 2.) Subtract whole numbers.
 $98 - 90 = 8$; $60 - 19 = 41$; $41 - 8 = 33$
- 3.) Compare whole numbers.
 $60 + 19 < 90 + 98$ (or subtract)
- 4.) Add decimal numbers.
 $0.9 + 0.98 + 0.6 + 0.19 = 2.67$
- 5.) Subtract decimal numbers.
 $0.98 - 0.9 = 0.08$
