LOVED BY TEACHERS

"My students loved this resource! They were engaged the whole time. It was easy to prep and not much was required to add it to my lesson. It is absolutely worth the purchase."

-Yolanda S

"I really appreciated the fun way Tammy used to get my students into writing a good paragraph. We started with the activity and identifying what goes into making a paragraph, which is like the thumb chart. Then we worked our way up to finding the topic sentence and details with conclusions in the mentor text examples she had, those I made had on promethean board and did by small group to save on printing. Finally, they could write their own slowly with boxes, to hamburger or sandwich fun. My ELLs, RSP, and reg. ed students all felt successful making a paragraph. NOW they make paragraphs using creative writing in them!"

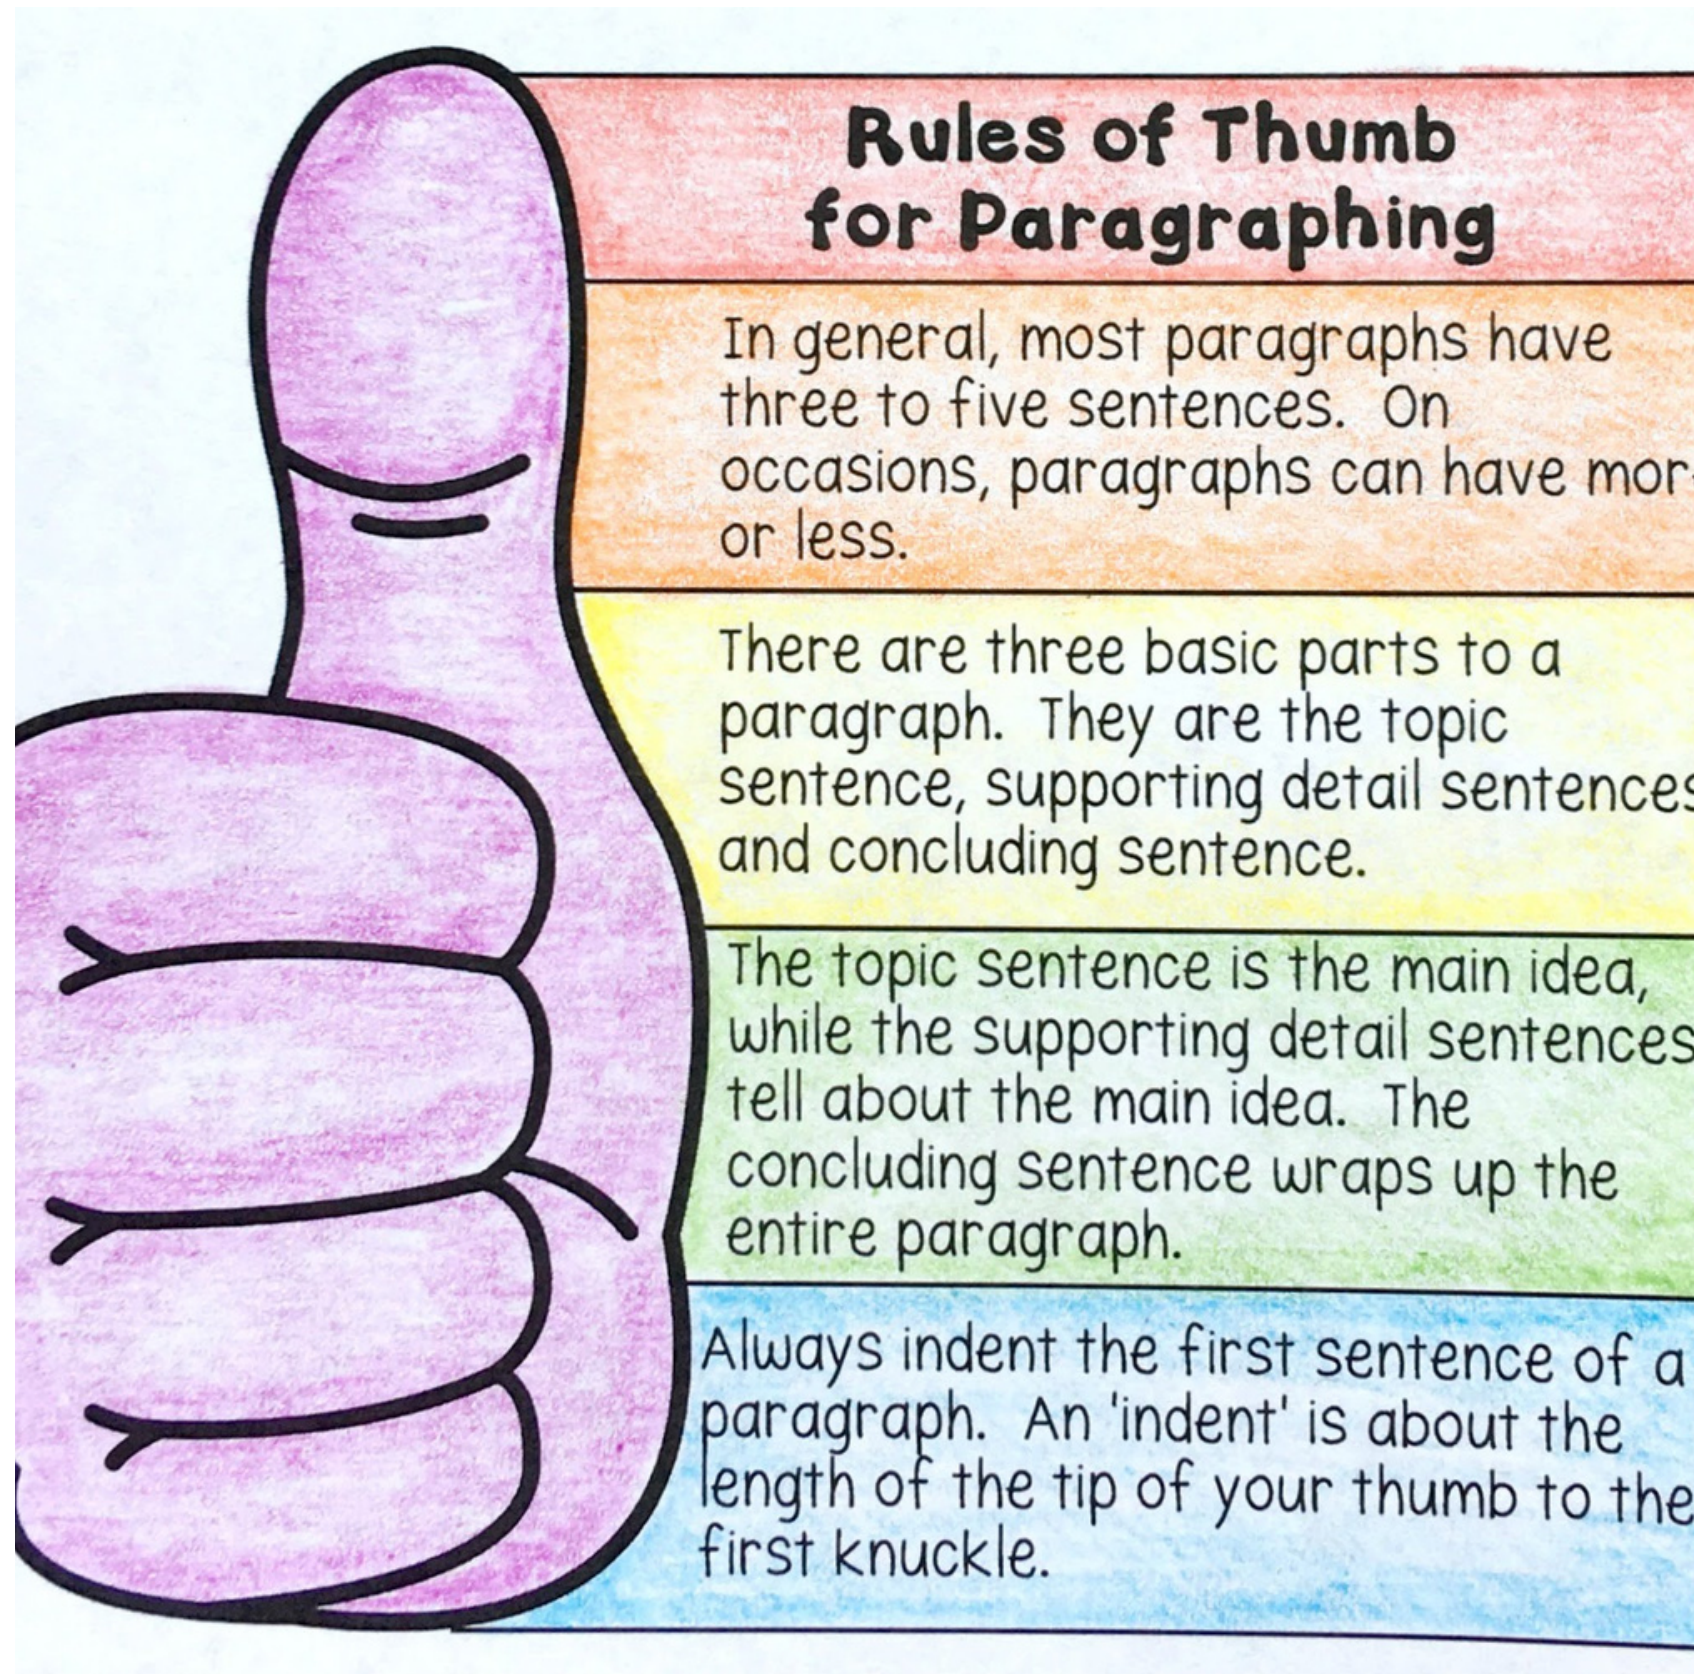

-Laureen K

"LOVED THIS RESOURCE! I've always struggled to make it clear and understandable when teaching paragraphs but now I feel so much better about it all using this! Every kid in my class now writes paragraphs properly!"

-Yasmin E
