

2 Truths and 1 Fib task cards

Print task cards

- 10 task cards/worksheets. 2 task cards per page. Black and white only
- Answer sheet and recording sheet
- Each of these task cards/worksheets has 3 statements on them. One of the statements is false and two of the statements are true. Students need to look up the answers in the online encyclopedia or the internet.
- I used the World Encyclopedia Online Kids version to create the statements. Once the student figures out which statement is false, they need to re-write the false statement to make it true. I included an answer key. I also added a recording sheet in case you need it.
- You can use these task cards/worksheets in a couple different ways.
 - You can pass out the worksheet to students and have them write the answers on the worksheet directly.
 - You can have students write their answers on the recording sheet (so you do not have to make as many copies).

<p>2 TRUTHS AND 1 FIB <small>Ostriches</small></p> <p>ANIMALS</p> <p>Read the statements below. Two of them is true. One of them is not. Research the statements online to determine which one is the fib. 2 Truths and 1 Fib task cards

Google Slides

- 10 slides - identical to the print task cards
- Answer sheet and recording sheet
- Each slide has 3 statements about an animal. Two of the statements are true and one is false (a fib). Students must look up the statements in the encyclopedia to find out which statement is the fib. On some slides, students may have to do more than one search.
- Once students determine which statements are true and which one is false, they will move a thumbs up or thumbs down picture in front of the statement.
- At the bottom of every slide is a spot for students to make the fib into a truth. Students will need to insert a text box and type their answer onto the slide.
- You can also have students write their answers on a recording sheet. I provided one for you to use. If you do not want to share the task cards through Google Classroom, then you will want to use the recording sheet.

2 TRUTHS AND 1 FIB - GIRAFFES

Directions: Read the statements. Two of them is true. One of them is not. Research the statements online to determine which one is the fib. Mark your answer. True = thumbs up. Fib = thumbs down.

① Giraffes can live weeks without water.

② Each giraffe has a different coat pattern.

③ Giraffes have 20 bones in their neck.

How can you make the fib into a truth? Write your proof below.

Giraffes have 7 bones in their neck.

2 TRUTHS AND 1 FIB - OSTRICHES

Directions: Read the statements. Two of them is true. One of them is not. Research the statements online to determine which one is the fib. Mark your answer. True = thumbs up. Fib = thumbs down.

① The ostrich can fly up to 15 miles per hour.

② The male ostrich has a strange call that sounds like a lion roaring.

③ An ostrich can weigh over 300 pounds.

How can you make the fib into a truth? Write your proof below.

Ostriches do not fly.

2 TRUTHS AND 1 FIB - MONKEYS

Directions: Read the statements. Two of them is true. One of them is not. Research the statements online to determine which one is the fib. Mark your answer. True = thumbs up. Fib = thumbs down.

① The snow monkey lives in Antarctica.

② Some macaque monkeys have no tails.

③ A howler monkey's roar can be heard over 2 miles away.

How can you make the fib into a truth? Write your proof below.

Snow monkeys live in Japan

2 TRUTHS AND 1 FIB - PENGUINS

Directions: Read the statements. Two of them is true. One of them is not. Research the statements online to determine which one is the fib. Mark your answer. True = thumbs up. Fib = thumbs down.

① Emperor penguins lay 4 or 5 eggs at a time.

② All wild penguins live south of the equator.

③ A chinstrap penguin has pink feet.

How can you make the fib into a truth? Write your proof below.

Emperor penguins lay 1 egg.
