6 PASSAGES

Henry Ford was an engineer, industrialist, and founder of Ford Motor Company. He did not invent the car or the assembly line, but he developed a process so that both could be used efficiently. Ford applied the assembly line concept to make building cars faster and cheaper. The assembly-line revolutionized the way cars were manufactured, and it is a technique still used today for mass-production.

Ford played a significant role in the Industrial Revolution, which occurred from the late 18th century to the mid-19th century.

Ford was born on July 30, 1863, in Michigan. His parents owned a farm and expected Henry to take over. Ford, however, disliked the idea. From a young age, Henry showed an interest in engines and at the age of 16, he got his first job as a mechanic. A few years later, he got a job at the Detroit Edison Company as an engineer. There, he met Thomas Edison, who became a lifelong friend.
