6 PASSAGES

Orville Wright and Wilbur Wright were known as the Wright Brothers. They were engineers and inventors credited with designing, building, and testing the very first controlled engine-powered airplane. Their invention paved the way for aviation and some features of the Wright Brothers' designs are still used in airplanes today.

Wilbur was born on April 16, 1867, in Indiana. His younger brother Orville was born on August 19, 1871, in Ohio. From an early age, the boys were encouraged by their father to read, ask questions, and explore. Growing up, their favorite toy was a helicopter that flew with rubber bands. The brothers experimented with building toy helicopters and dreamed of inventing something similar one day that could fit the two of them.

Their interest in flight began in the 1890s when they began studying aviation pioneers like Otto Lilienthal and Samuel Langley.
