

NORTH AMERICA

DIGITAL ESCAPE™

6 PASSAGES

There are seven continents that make up the land mass of the Earth. North America is the third largest continent of the seven, covering 9.4 million square miles. However, it is not third in population. North America has the fifth largest population with over 600 million people. The continent includes many interesting cities, geographical locations, landmarks, animals, food, and diverse cultures.

North America includes many countries occupying the same large mass of land as well as Central America and some Caribbean islands. The continent is home to 23 countries. The four largest countries in North America are Canada, the United States, Greenland, and Mexico. North America is bordered by the Atlantic Ocean to the east, the Pacific Ocean to the west, the Arctic Ocean to the north, and the Caribbean Sea to the south. The smallest North American country is St Kitts and Nevis with only about 54,000 inhabitants.
