# COLOR CODE

DRAG AND DROP the elements to fill in the reading passage,  
then enter the COLOR CODE.

**invasions**   **Huangdi**   **son**  
**compass**   **Xia dynasty**

Ancient China was one of the greatest and longest civilizations to exist in Asia, dating back thousands of years. There were 13 dynasties in ancient China beginning with the \_\_\_\_\_ and ending with the Qing. During each dynasty, the ruler was called the "\_\_\_\_\_" or emperor. Ancient China had over 500 emperors. When an emperor died, the power was usually passed down to the oldest \_\_\_\_\_. Natural barriers including the Himalayan Mountains, the Gobi Desert, the Tibetan Plateau, the Yellow Sea, and the Chinese Sea helped to protect ancient China from \_\_\_\_\_.

Ancient China is known for many incredible inventions that are still used today. Although they invented many things, the four most well-known inventions include silk, the \_\_\_\_\_, paper, and printing.

# 9 CHALLENGES

After successfully completing each challenge students will earn a number for the final lock code.

**Nice job sleuth!**

# 6 PASSAGES

STUDENTS WILL READ 6 SHORT PASSAGES ABOUT THE TOPIC,  
THEN ANSWER QUESTIONS.

During the first three dynasties of China, the country was not united, with different rulers in each area. The first dynasty to rule ancient China was the Xia dynasty, founded by Yu the Great. Very little is known about this dynasty, and some don't believe it existed. With 17 emperors, this dynasty reigned for almost 500 years. Some historians argue whether the Xia dynasty was actually real or a legend, but discoveries in archaeology support its existence. After the Xia dynasty came the Shang dynasty, sometimes referred to as the Yin dynasty. This dynasty ruled along the Yellow River for roughly 500 years and grew weak due to constant fighting. The Shang was the first dynasty to have a written record of events. The Zhou dynasty followed as the third dynasty of ancient China and lasted longer than any other Chinese dynasty.
