King James I of England paid for an expedition (journey) to start a new colony in North America. The king gave his approval to business called the Virginia Company, to explore and settle a new colony.

In 1607 King James I gave the Virginia Company the charter (permission) to start a new colony. The Virginia Company expected to find gold in the New World.

They also had hopes of making money by growing and making things in the new colony that they could ship back to England.

The crew set sail on December 20, 1606 and the journey took four months. The ships were named the Godspeed, Susan Constant and the Discovery.

The three ships first sailed to the Canary Islands. They then landed in Puerto Rico to stop for fresh food and water. From there, the ships headed north and landed at Cape Henry in Virginia on April 26, 1607.
