After World War II ended in the 1940s, a new conflict emerged. The United States and the Soviet Union (USSR) changed their relationship. Throughout WWII, they had a strained peace as members of the Allied forces against Germany, Japan, and their Axis Powers.

Both the United States and the Soviet Union understood the importance of rockets. They had already developed the atomic bomb and other dangerous weapons. Yet, rocket science would demonstrate a country's achievements in space. As a result, German rocket scientists were in demand. In 1955, both countries announced their plans for launching satellites into orbit.

The Space Race began as a competition between the two superpowers. Each country wanted the best science and technology. Also, each superpower wanted to send the first crew aboard a spacecraft into orbit.
