6 PASSAGES

Albert Einstein is known to be one of the most brilliant scientists in history. He studied and created theories (new ideas) on gravity, matter, light and more. His discoveries set the foundation for modern day physics. Today, we have great conveniences, thanks to Einstein's contributions to science. Televisions, garage door openers, and DVD players wouldn't have been invented without Einstein.

Einstein was born in Germany in 1879 and had a younger sister named Maja. His father was a salesman and his mother was a musician. He was curious from an early age but did not do very well in school. He often clashed with his teachers, who found him to be difficult and rebellious. He did not speak until the age of four. From four to the age of seven, he repeated sentences over and over. Einstein didn't even begin reading until age nine. Math riddles, playing music, and making towers from cards were his favorite hobbies as a kid.
